FOREWORD

This issue of the **PATHFINDER** is published principally, in response to a growing demand for an aid to:

(i) Candidates preparing to write future examinations of the Institute of Chartered Accountants of Nigeria (ICAN).

(ii) Unsuccessful candidates in the identification of those areas in which they lost marks and need to improve their knowledge and presentation.

(iii) Lecturers and students interested in acquisition of knowledge in the relevant subjects contained herein, and

(iv) The profession in improving pre-examinations and screening processes, and so the professional performance of candidates.

The answers provided in this publication do not exhaust all possible alternative approaches to solving the questions. Efforts have been made to use the methods which will save much of the scarce examination time. Also, in order to facilitate teaching, questions may be altered slightly so that some principles or application of them may be more clearly demonstrated.

It is hoped that the suggested answers will prove to be of tremendous assistance to students and those who assist them in their preparations for the Institute’s Examinations.

NOTES

Although these suggested solutions have been published under the Institute’s name, they do not represent the views of the Council of the Institute. The suggested solutions are entirely the responsibility of their authors and the Institute will not enter into any correspondence on them.

PATHFINDER

THE INSTITUTE OF CHARTERED ACCOUNTANTS OF NIGERIA

INTERMEDIATE – NOVEMBER 2013

COSTING AND QUANTITATIVE TECHNIQUES

Time Allowed:  3 hours

SECTION A:  PART I  MULTIPLE-CHOICE QUESTIONS  (20 Marks)

ATTEMPT ALL QUESTIONS  IN THIS SECTION

Write ONLY the alphabet (A, B, C, D or E) that corresponds to the correct option in each of the following questions/statements:

1. In relation to cost accounting, which of the following is CORRECT?
   A. Information is mainly produced for external use.
   B. The purpose of information is to record financial performance.
   C. Formats and contents of accounts should follow accounting standards.
   D. Time period is historical and futuristic.
   E. It is regulated by legal requirement.

2. The issue of materials from store is done using a Material Requisition Note. Which of the following is NOT contained in a Material Requisition Note?
   A. Quantity
   B. Authorisation
   C. Stock balance
   D. Description
   E. Job or centre charged

3. Which of the following cost pool-cost driver relationship is INCORRECT?
   A. Machine Costs  Machine hour
   B. Engineering support  Requisition raised
   C. Set-up  Number of set-ups
   D. Inspection  Number of inspections
   E. Materials handling  Materials movement
4. Which of the following is NOT a benefit of a quantitative expression of a plan of action prepared in advance of the period to which it relates?

A. Planning  
B. Co-ordination  
C. Communication  
D. Management by Exception  
E. Demoralisation

5. Information is required for setting standard cost. Which of the following is NOT a source of information required?

A. Material prices  
B. Labour rate  
C. Material input quantity  
D. Pre-determined overhead rate  
E. Labour efficiency

6. The following pieces of information were extracted from the records of XYZ Limited:

- Average stock usage: 50,000 units/day
- Minimum usage: 20,000 units/day
- Maximum usage: 150,000 units/day
- Economic Order Quantity: 200,000 units/day
- Re-order period: 4-7 days

What is the maximum stock level?

A. 420,000 units  
B. 900,000 units  
C. 1,110,000 units  
D. 1,170,000 units  
E. 1,200,000 units
7. A machine costing ₦25 million is expected to produce 12.5 billion units of product Y over its working life of 10 years after which it will be disposed of for ₦500,000. Using the production units method, what will be the depreciation charge for year 3 with a production of 900 million units of product Y?

A. ₦2,500,000  
B. ₦2,000,000  
C. ₦1,900,000  
D. ₦1,800,000  
E. ₦1,764,000

8. Where separate sets of books are maintained for cost and financial accounting, the profit disclosed differs due to appropriation of profits. Which of the following is NOT an appropriation of profit?

A. Dividends  
B. Income tax  
C. Transfer to a reserve account  
D. Loss on sale of investment  
E. Amortization of fictitious assets

9. Planning Programming Budgeting System (PPBS) technique is basically related to government budgeting. Which of the following is NOT one of its objectives?

A. Budgeting on a multi-year basis  
B. Identification of real and actual objectives of expenditures  
C. Segregation of projects into core and non-core  
D. Elimination of inefficiencies and wastes  
E. Budgeting on a yearly basis

10. Which of the following is NOT a cost associated with Labour Turnover?

A. Cost of lower initial production  
B. Cost of training  
C. Cost of replacement of personnel  
D. Cost of industrial actions  
E. Cost of learning on the job
11. In decision making, the only relevant costs are those which will change as a result of the decision. Which of the following is a relevant cost:

A. Sunk Cost  
B. Cost of fully utilised resource  
C. Committed costs  
D. Book values of assets  
E. Stockout cost

12. The following data were extracted from the records of ABCD Limited.

<table>
<thead>
<tr>
<th>Period</th>
<th>Quantity (Units)</th>
<th>Cost of inspections (₦)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>9,000</td>
<td>327,000</td>
</tr>
<tr>
<td>2</td>
<td>15,000</td>
<td>375,000</td>
</tr>
<tr>
<td>3</td>
<td>600</td>
<td>259,800</td>
</tr>
<tr>
<td>4</td>
<td>18,000</td>
<td>399,000</td>
</tr>
</tbody>
</table>

Using the high-low method, what is the estimated cost of carrying out inspection in period 5 on 12,000 units?

A. ₦351,000  
B. ₦345,000  
C. ₦255,000  
D. ₦240,000  
E. ₦96,000

13. The quantities of water needed for a particular construction are 30 tankers and $q_0$ tankers. If the quantity relative is 60%, then the value of $q_0$ is

A. 20  
B. 30  
C. 40  
D. 50  
E. 60
14. In a certain conference on economic reforms, there are 520 delegates, out of which 175 are Economists, 255 are Chartered Accountants and 110 are neither Economists nor Chartered Accountants. How many delegates are both Economists and Chartered Accountants?

A. 20  
B. 30  
C. 40  
D. 50  
E. 60

15. If the Earliest Start Time (EST), Latest Finish Time (LFT) and Duration (D) of an activity P are 8 weeks, 15 weeks and 2 weeks respectively, then its float is

A. 5 weeks  
B. 4 weeks  
C. 3 weeks  
D. 2 weeks  
E. 1 week

16. If a fair coin and an unbiased die are tossed together, the probability of obtaining no head and no number greater than 3 is

A. \( \frac{1}{4} \)  
B. \( \frac{1}{3} \)  
C. \( \frac{1}{2} \)  
D. \( \frac{2}{3} \)  
E. \( \frac{3}{4} \)
17. If a matrix $M$ is given by $M = \begin{pmatrix} 1 & 2 \\ 3 & 4 \end{pmatrix}$, the matrix of cofactors of $M$ is

A. $\begin{pmatrix} 4 & -3 \\ -2 & 1 \end{pmatrix}$
B. $\begin{pmatrix} 1 & -2 \\ -3 & 4 \end{pmatrix}$
C. $\begin{pmatrix} 1 & -3 \\ -2 & 4 \end{pmatrix}$
D. $\begin{pmatrix} -1 & 3 \\ 2 & -4 \end{pmatrix}$
E. $\begin{pmatrix} -1 & 2 \\ 3 & -4 \end{pmatrix}$

18. Which of the following methods is regarded as the most efficient with respect to the initialisation of a transportation problem?

A. North-west corner method
B. Stepping stone method
C. Least cost method
D. Vogel's approximation method
E. Simplex method

19. The demand function of a business is given as $d(x) = 3x^2 + 20x$. Calculate the marginal revenue when $x = 10$

A. $80$
B. $500$
C. $1,200$
D. $1,300$
E. $5,000$
20. The capacitors in an electronic counting machine used in a particular bank have a limited life span and the table below shows the proportion of failures of the capacitors:

<table>
<thead>
<tr>
<th>Week after replacement</th>
<th>1</th>
<th>2</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cumulative % of failures</td>
<td>35</td>
<td>70</td>
<td>100</td>
</tr>
</tbody>
</table>

The average life span of the capacitors is

A. 1.65  
B. 1.95  
C. 2.05  
D. 3.95  
E. 4.75

SECTION A: PART II SHORT-ANSWER QUESTIONS (20 Marks)

ATTEMPT ALL QUESTIONS IN THIS SECTION

Write the correct answer that best completes each of the following questions/statements:

1. The document which provides the details necessary to ascertain values and physical stock of materials is known as ......................................

2. A system which distinguishes stock items by distinctive alphabets and/or numbers is referred to as..............................................

3. The summation of indirect materials, indirect labour and indirect expenses is..........................

4. The deduction of net realisable value from the total joint cost is the accounting treatment given to..........................

5. An inventory valuation method that assumes that the materials are used up in the same sequence as they are purchased is..........................

6. Most times, the actual performance differs from the standard set. The difference is..........................
7. An assessment which is carried out during the design stage of a product to achieve the desired objectives at minimum cost is known as....................

8. If revenue is the most crucial part of a company’s operations, then the foundation of all budgets is the........................

9. A location, person or an item of equipment in relation to which cost may be ascertained and used for the purpose of cost control is called....................... 

10. From the records of KKK Limited, the following data were extracted:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Budgeted labour hours</td>
<td>6,000 hours</td>
</tr>
<tr>
<td>Standard hours produced</td>
<td>5,400 hours</td>
</tr>
<tr>
<td>Actual labour hours</td>
<td>5,760 hours</td>
</tr>
</tbody>
</table>

Calculate the capacity ratio.

11. A manufacturing system where the target is zero defect is called--------------

12. Budgeted sales of XYZ company for three months are as follows:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Month 1</td>
<td>2,000,000</td>
</tr>
<tr>
<td>Month 2</td>
<td>2,400,000</td>
</tr>
<tr>
<td>Month 3</td>
<td>1,800,000</td>
</tr>
</tbody>
</table>

If debtors pay according to the following pattern: 60% in the month of sale, 25% in the month after and 15% from the third month. What is the cash receipt in month 3?

13. A sample space contains all the possible ......................in a ......................experiment.

14. Differentiation is a mathematical concept dealing with ...............of .............of a variable.

15. Simplex method of solving a Linear Programming problem requires at least

.......................decision variables.
16. Consider the following table:

<table>
<thead>
<tr>
<th>Year</th>
<th>2010</th>
<th>2011</th>
<th>2012</th>
</tr>
</thead>
<tbody>
<tr>
<td>Price(₹)</td>
<td>30</td>
<td>X</td>
<td>120</td>
</tr>
</tbody>
</table>

If the price index for year 2010 is 80.2% with 2011 as the base year, then the value of X to the nearest whole number is ..........................................

17. If every member of set P is a member of set Q and every member of set Q is a member of set P, then the two sets P and Q are said to be .............................

18. The second phase of solving a typical transportation problem is the ..........test

19. A symmetric matrix is a .................. matrix whose .................. is the same as the original matrix.

20. In Network Analysis, all ...................... must begin and end with .................

SECTION B: ATTEMPT ANY FOUR QUESTIONS IN THIS SECTION (60 Marks)

SUB-SECTION I: COSTING - ATTEMPT TWO QUESTIONS FROM THIS SUB-SECTION

QUESTION 1

(a) Explain **FIVE** qualities of a good cost accounting information. (5 Marks)

(b) Outline, in a logical sequence, the steps in Activity-Based Costing (ABC) System. (5 Marks)

(c) List **FIVE** effects which the increase in automation will have on manufacturing from a cost accounting viewpoint. (5 Marks)

(Total 15 marks)
QUESTION 2

The following data were extracted from the records of JAKUJAKU LIMITED for the period of one accounting year:

<table>
<thead>
<tr>
<th></th>
<th>MACHINING</th>
<th>FINISHING</th>
<th>STORES</th>
<th>MAINTENANCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>No of employees</td>
<td>22</td>
<td>58</td>
<td>7</td>
<td>13</td>
</tr>
<tr>
<td>Labour hours</td>
<td>76,032</td>
<td>200,448</td>
<td>24,192</td>
<td>44,928</td>
</tr>
<tr>
<td>Asset value(₦)</td>
<td>5,200,000</td>
<td>1,240,000</td>
<td>650,000</td>
<td>910,000</td>
</tr>
<tr>
<td>KWH('000)</td>
<td>400</td>
<td>250</td>
<td>70</td>
<td>180</td>
</tr>
<tr>
<td>Area occupied (sqm)</td>
<td>2,500</td>
<td>1,450</td>
<td>1,650</td>
<td>600</td>
</tr>
<tr>
<td>Materials requisition</td>
<td>1,220</td>
<td>980</td>
<td>-</td>
<td>750</td>
</tr>
<tr>
<td>Machine hours</td>
<td>34,560</td>
<td>13,824</td>
<td>-</td>
<td>-</td>
</tr>
<tr>
<td>Indirect materials(₦)</td>
<td>2,600,000</td>
<td>2,100,000</td>
<td>255,000</td>
<td>950,000</td>
</tr>
<tr>
<td>Direct labour(₦)</td>
<td>720,000</td>
<td>1,200,000</td>
<td>360,000</td>
<td>180,000</td>
</tr>
</tbody>
</table>

The following additional information was given:

- Generator - Fuel and oil: 1,953,000
- Canteen expenses: 2,640,000
- Rent: 5,580,000

Maintenance is apportioned using asset value for the secondary apportionment excluding the stores.

You are required to

Prepare, in a columnar form, the allocation and apportionment of overheads. Figures are to be rounded up to the nearest Naira.

(15 Marks)

QUESTION 3

XEEWEE LIMITED makes and sells one product XW of which the materials XEE and WEE were added in equal quantity to make 5 kg/unit. The price of XEE is ₦50/kg while that of WEE is ₦65/kg.
Estimated sales volumes for the 4 quarters of the year are as follows:

<table>
<thead>
<tr>
<th>Quarter</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quarter 1</td>
<td>40,000</td>
</tr>
<tr>
<td>Quarter 2</td>
<td>60,000</td>
</tr>
<tr>
<td>Quarter 3</td>
<td>55,000</td>
</tr>
<tr>
<td>Quarter 4</td>
<td>45,000</td>
</tr>
</tbody>
</table>

Opening stock of the first quarter is 5,000 units. It is the company’s policy to keep 15% of the next quarter’s sales volume as the closing stock in a period.

You are required to prepare

(a) Production quantity budget in a columnar form for the first 3 quarters

(b) Quantity and value of materials to be purchased for the first 3 quarters

(6 Marks)

(9 Marks)

(Total 15 Marks)

QUESTION 4

XYZ Limited is in the garment industry and recently accepted an order for the production of a special order called batch XYZ001 for 2,000 units.

The following costs were incurred:

- Department M: 840 labour hours @ ₦ 700/hr
- Department F: 600 labour hours @ ₦ 1,200/ hr
- Direct Materials: ₦1,245,000

It is the company’s policy to adopt the cost plus system for setting selling prices and a gross profit of 25% of sales is expected.

Factory overheads are absorbed at ₦350/hr for department M and ₦480/hour for Department F. Administration and marketing overheads are absorbed at 10% of selling price.

(a) You are required to calculate the

(i) Selling price per unit

(8 Marks)
(ii) Net profit  

(b) List **FOUR** requirements necessary for an effective and workable job costing system.  

**SUB-SECTION II: QUANTITATIVE TECHNIQUES – ATTEMPT TWO QUESTIONS FROM THIS SUB-SECTION**

**QUESTION 5**

Five different components P, Q, R, S and T of a manufacturing plant were purchased by AJELOGO NIGERIA LIMITED in September of the years 2010 and 2013 is tabulated below:

<table>
<thead>
<tr>
<th>Plant component</th>
<th>Year 2010 Price (Nm)</th>
<th>Quantity</th>
<th>Year 2013 Price (Nm)</th>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>10</td>
<td>22</td>
<td>8</td>
<td>20</td>
</tr>
<tr>
<td>Q</td>
<td>16</td>
<td>18</td>
<td>10</td>
<td>18</td>
</tr>
<tr>
<td>R</td>
<td>20</td>
<td>17</td>
<td>18</td>
<td>14</td>
</tr>
<tr>
<td>S</td>
<td>22</td>
<td>15</td>
<td>20</td>
<td>10</td>
</tr>
<tr>
<td>T</td>
<td>25</td>
<td>8</td>
<td>28</td>
<td>6</td>
</tr>
</tbody>
</table>

You are required to

Use 2010 as the base year to construct an Aggregate Price Index number using

(a) Laspeyre’s method  

(b) Paasche’s method  

**QUESTION 6**

(a) Given that the demand function of a business is \( P(x) = 3x^2 - 4x + 13 \), calculate the price elasticity of demand when \( x = 5 \) and interpret your result.
(b) DEMJAS Ventures has established its total cost function to be 
\[ TC(q) = 5q^4 - 195q^3 - 1800q^2. \]
Determine the minimum quantity for the average cost.  
(6 Marks)

(c) Given that the Total Revenue (TR) function is 
\[ TR = 24x - 3x^2 \]
and the Total Cost (TC) function is 
\[ TC = 100 + 4x + 2x^2, \]
at what level of output is profit maximised? 
(5 Marks)  
(Total 15 Marks)

QUESTION 7

A furniture maker produces two types of executive upholstery chair. They are ABIOK and TETRA. Both types of chair undergo three different processing stages. The number of man-hours required for the different stages is given in the table below:

<table>
<thead>
<tr>
<th>Types of chair</th>
<th>Cutting time (hr)</th>
<th>Assembling time (hr)</th>
<th>Spraying time (hr)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ABIOK</td>
<td>3</td>
<td>5</td>
<td>2</td>
</tr>
<tr>
<td>TETRA</td>
<td>2</td>
<td>4</td>
<td>2.5</td>
</tr>
</tbody>
</table>

Monthly total time available

<table>
<thead>
<tr>
<th></th>
<th>Cutting time (hr)</th>
<th>Assembling time (hr)</th>
<th>Spraying time (hr)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ABIOK</td>
<td>450</td>
<td>800</td>
<td>500</td>
</tr>
<tr>
<td>TETRA</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

ABIOK type sells for ₦6,500 each and TETRA type sells for ₦5,800 each.

You are required to

(a) Formulate the information given as a Linear Programming problem.  
(5 Marks)

(b) Determine the optimal level of production for the month using graphical method.  
(10 Marks)  
(Total 15 Marks)
SOLUTION TO SECTION A

PART 1  MULTIPLE-CHOICE QUESTION

Tutorials

6. Re-order level + Re-order Quantity – (Minimum Usage x Minimum Re-order Period)
   = (Minimum Usage x Maximum Re-order Period) + EOQ –
   (Minimum Usage x Minimum Period)
   $150,000 \times 7 + 200,000 - 20,000 \times 4$
   $1,050,000 + 200,000 - 80,000$
   $= 1,170,000$ units

7. Depreciation/Unit = $\frac{₦25\text{ million}}{2.5\text{ billion}} = 0.002$
   Change for year 3 = $₦900,000,000 \times 0.002$
   $= ₦1,800,000.00$

   OR

   Yearly production = $12.5\text{ billion} = 1.25\text{ billion/year}$
   $\frac{900\text{ million} \times ₦25\text{ million}}{1.25\text{ billion} \times 10\text{ years}}$
   $= ₦1,800,000$

12. $18,000 - 600 = 17,400$ units
   $₦399,000 - ₦259,800 = 19,200$
   Variable cost/unit = $\frac{₦139,200}{17,400} = ₦8$
   Fixed cost = $₦259,800 - (600 \times ₦8.00) = ₦255,000$
   Cost of 12,000 units
   $= 12,000 \times 8 + ₦255,000$
   $= ₦351,000$
13. Quantity relative = \( \frac{q_1 \times 100}{q_0} \)

\[ \therefore \frac{60}{100} = \frac{30}{q_0} \]

\[ q_0 = \frac{30 \times 100}{60} = 50 \]

14. \( n(\cup) = 520 \)
\( n(E) = 175, n(CA) = 255, n(E \cup CA)^1 = 110 \)
\( n(\cup) = n(P \cap VA) + n(P \cup CA)^1 \)
\( n(P \cup CA) = 520 - 110 = 410 \)
\( n(P \cap CA) = n(P) + n(CA) - n(P \cup CA) \)
\[ = 175 + 225 - 410 \]
\[ = 20 \]

Aliter

From the venn-diagram, we have
\( 175 + 255 - x + 11 = 520 \)
\[ x = 540 - 520 \]
\[ = 20 \]

15. Float = \( LFT - EST - D \)
\[ = 15 - 8 - 2 \]
\[ = 5 \]
16.

<table>
<thead>
<tr>
<th>H</th>
<th>H1</th>
<th>H2</th>
<th>H3</th>
<th>H4</th>
<th>H5</th>
<th>H6</th>
</tr>
</thead>
<tbody>
<tr>
<td>T</td>
<td>T1</td>
<td>T2</td>
<td>T3</td>
<td>T4</td>
<td>T5</td>
<td>T6</td>
</tr>
</tbody>
</table>

Probability of obtaining no head and no number greater than 3 is obtained using the underlined sample points.

i.e. required probability $= \frac{3}{12} = \frac{1}{4}$

17. Let the matrix of the cofactors of $M$ be defined as

$$
C = \begin{pmatrix}
C_{11} & C_{12} \\
C_{21} & C_{22}
\end{pmatrix}
$$

where $C_{11} = (-1)^{1+1}M_{11} = M_{11} = 4$

$C_{12} = (-1)^{1+2}M_{12} = -M_{12} = -3$

$C_{21} = (-1)^{2+1}M_{21} = -M_{21} = -2$

$C_{22} = (-1)^{2+2}M_{22} = M_{22} = 1$

$\therefore C = \begin{pmatrix} 4 & -3 \\
-2 & 1 \end{pmatrix}$

19. $d(x) = 3x^3 + 20x$

$R(x) = xd(x) = 3x^4 + 20x^2$

$\frac{dR(x)}{dx} = 9x^2 + 40x$

when $x = 10 \frac{dR(x)}{dx} = 900 + 400$

$\therefore \frac{dR(x)}{dx} = 1300$

20. Average life span of the capacitors is

$(1 \times 35\%) + [2 \times (70 - 35\%)] + [3 \times (100 - 70\%)]$

$= 0.35 + 0.70 + 0.90 = 1.95$
EXAMINERS’ REPORT

The questions test various aspects of the syllabus.

Virtually all the candidates attempted the questions and performance was fairly good as about 40% of the candidates scored 50% or above of the marks allocated.

It is recommended that candidates should read wide for future examinations in order to improve performance.

PART II SHORT-ANSWER QUESTIONS

1. Stores Ledger Card
2. Coding
3. Overheads
4. By-products
5. First-In-First-Out (FIFO)
6. Variance
7. Value Analysis
8. Sales Budget or Sales
9. Cost Centres
10. 96%
11. Just-In-Time (JIT)
12. ₦1,980,000
13. Outcomes, random (in that order)
14. Rate, change (in that order)
15. Two
16. 37
17. Equal
18. Optimality
19. Square, transpose (in that order)
20. Activities, an event (in that order)

**Tutorials**

10. \[
\frac{5760 \times 100}{6000} = 96\% \\
\]

12. \[
\begin{align*}
2,000,000 \times 15\% &= 300,000 \\
2,400,000 \times 25\% &= 600,000 \\
1,800,000 \times 60\% &= 1,080,000 \\
1,980,000
\end{align*}
\]

16. Price Index = \[ \frac{P_n}{P_o} \times 100 \]

\[
80.2 = \frac{30}{x} \times 100 \\
\therefore x = \frac{30 \times 100}{80.2} = 37.4 \quad \text{___} 37
\]

**EXAMINERS’ REPORT**

The questions cover a sizeable proportion of the syllabus. Performance was good as about half of the candidates scored 50% or above of the allocated marks.

Performance can be better if candidates spend qualitative time in preparing for future examinations.
SECTION B

QUESTION 1

(a) The required quantities of good cost accounting information are

i. Relevance: The information should be relevant to the user(s) and the purpose for which it is needed.

ii. Timeliness: The information is to be supplied early for the purpose for which it is required.

iii. Reliability: The information produced should be dependable.

iv. Accuracy: The information should be exact and devoid of error and mistakes.

v. Understandability: The information should not be too complex or ambiguous or too difficult to understand.

vi. Completeness: The information should show full disclosure of what is required.

vii. Objectivity: The information should not be subjective or personal to the originator.

viii. Comparability: The information should give room for comparative analysis with information provided in the previous period(s).

ix. Conciseness: The cost accounting information must be free from irrelevances.

x. Verifiability: Users of the cost accounting information must be able to verify its correctness.

xi. Compliance: The information must comply with professional and management guidelines.
xii. Costs: The report must have cost implications or else processing it will be worthless.

xiii. Title: The information must be properly titled.

(b) In outline, an ABC system can be developed and used as follows:

Step 1 - Identify the main activities in the organisation e.g. purchasing, despatch, machining etc.

Step 2 - Identify the factors which determine the cost of an activity. These are known as cost drivers.

Step 3 - Collect the cost of each activity. These are known as cost pools.

Step 4 - Charge support overheads to products on the basis of their usage of the activity expressed in terms of the chosen cost drivers.

(c) Effects of increasing automation from a cost accounting point of view are

i. Reduction in direct labour costs per unit.

ii. Increase in overhead costs caused by purchasing, maintaining, depreciating and operating expensive equipment.

iii. Change in cost structures; reducing variable costs and increasing fixed costs.

iv. Makes labour hours increasingly unsuitable as an overhead absorption base.

v. Fewer production workers and more support staff.

vi. Due to (c) above, the firm’s break-even point has been raised.

vii. Reduced cost per unit.

viii. Efficient production planning system.

ix. Better quality control system.
x. More realistic absorption of production overhead costs.

xi. Maximise efficient use of machines and other assets.

xii. Ensures better Enterprise Resource Planning System (ERPS)

EXAMINERS’ REPORT

This question is in three parts and are meant to test candidates’ understanding of the qualities of good Cost Accounting Information, steps required in Activity-Based System and effects of automation in manufacturing.

The question was popular among the candidates as about 95% attempted it. Performance was fairly good as about half of the candidates scored 50% or above of the marks allocated.

The common shortcomings among the candidates who performed poorly include

i. Poor communication resulting in inability to express themselves effectively.

ii. Many candidates misconstrued good qualities with the attendant benefits.

iii. Some candidates confused office automation with Manufacturing Automation.

iv. Part (c) of the question was ignored by many candidates and the few who attempted it misunderstood the requirements of the question.

It is recommended that candidates should improve on the presentation of answers and work harder by covering the syllabus.
### QUESTION 2

</tr>
</tbody>
</table>

**EXAMINER’S REPORT**

The question tests candidates’ knowledge of overhead absorption and apportionment.

About 55% of the candidates attempted this question.

Performance was above average as about 60% of candidates who attempted the question scored half of the marks or more.

Common pitfalls among the candidates who didn’t perform well include the following:

i. The rationale for choosing a basis of apportionment for an overhead cost was not well understood.
ii. Formats used were unknown to cost accounting.
iii. Wrong calculations.
For improved performance in future, it is recommended that candidates should

i. Have better grasp of the contents of the syllabus.
ii. Improve in their Layouts.
iii. Attempt to work on past question papers.

**QUESTION 3**

**XEEWEE LIMITED**

(a) Production Quantity Budget

</tr>
</tbody>
</table>

### EXAMINERS’ REPORT

The question tests candidates’ knowledge of

a. Production budget in quantity.

b. Material purchase budget in quantity and value.

About 25% of the candidates attempted the question.

Performance was average as about half of the candidates who attempted the question scored 50% or above.
Pitfalls identified were as follows:

i. Presentation was disjointed and format was poor.

ii. Candidates’ inability to derive the value of stock at the end of each of the three quarters.

It is recommended, for improved performance, that candidates should

i. Cover the syllabus more effectively.

ii. Create quality study time.

iii. Seek improved quality of tuition.

**QUESTION 4**

**XYZ LIMITED**

**BATCH XY2001**

a(i) Calculation of selling price per unit

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Material</td>
<td>1,245,000</td>
</tr>
<tr>
<td>Labour - Dept M (840 x 700)</td>
<td>588,000</td>
</tr>
<tr>
<td>Labour - Dept F (600 x 1200)</td>
<td>720,000</td>
</tr>
<tr>
<td>Prime Cost</td>
<td>2,553,000</td>
</tr>
</tbody>
</table>

Overhead Absorbed

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Dept. M. (840 x 350)</td>
<td>294,000</td>
</tr>
<tr>
<td>Dept. F. (600 x 480)</td>
<td>288,000</td>
</tr>
<tr>
<td>Factory Cost (75%)</td>
<td>3,135,000</td>
</tr>
</tbody>
</table>

\[ \text{Sales Value} = \frac{3,135,000}{75} \times 100 \]

\[ = 4,180,000 \]

Selling price per unit

\[ = \frac{4,180,000}{2000} \]

\[ = \text{₦2,090} \]
a(ii) Calculation of Net Profit

Sales Value  ₦4,180,000

Less: Factory Cost ₦3,135,000
Gross Profit ₦1,045,000

Less: Admin & Marketing ₦418,000
Net Profit ₦627,000

(b) The following are the requirements for an effective and workable job costing system.

i. A sound system of production control
ii. Comprehensive works documentation
iii. An appropriate time booking system using either time sheets or piecework tickets.
iv. A well organised costing system with clearly defined cost centres.
v. Good labour analysis and appropriate overhead absorption rate.

EXAMINERS’ REPORT

The question is in two parts. It is designed to test candidates’ ability to

a. Carry out a job costing and price fixing exercise.

b. List the requirements for an effective job costing system.

About 55% of the candidates attempted the question.
Performance was fairly good. About half of the candidates who attempted the question scored 50% or above particularly in part (a). In general, candidates did not show good understanding of part (b).

Common pitfalls among the candidates include the following:

i. Poor presentation
ii. Poor calculations
For improved performance in future, it is recommended that candidates should

i. Study more effectively

ii. Use ICAN Pathfinders to assist in solving similar questions

iii. Acquaint themselves with good presentation formats

iv. Spend time to understand the requirements of questions before attempting to solve them.

**QUESTION 5**

**Index Numbers**

<table>
<thead>
<tr>
<th>Amount Component</th>
<th>Year 2010</th>
<th>Year 2013</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Price ($P_0$)</td>
<td>Qty ($q_o$)</td>
</tr>
<tr>
<td>P</td>
<td>10</td>
<td>22</td>
</tr>
<tr>
<td>Q</td>
<td>16</td>
<td>18</td>
</tr>
<tr>
<td>R</td>
<td>20</td>
<td>17</td>
</tr>
<tr>
<td>S</td>
<td>22</td>
<td>15</td>
</tr>
<tr>
<td>T</td>
<td>25</td>
<td>8</td>
</tr>
<tr>
<td><strong>TOTAL</strong></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

With 2010 as the base year,

(a) Laspeyre’s method

Price Index number $= \frac{\sum P_1q_o \times 100}{\sum P_0q_o}$

$= \frac{1186 \times 100}{1378}$

$= 86.07\%$

(b) Paasche’s method

Index number $= \frac{\sum P_1q_1 \times 100}{\sum P_0q_o}$

$= \frac{960}{1138 \times 100}$

$= 84.35\%$
EXAMINERS’ REPORT

The question tests candidates’ knowledge of Index Numbers with respect to Laspeyre and Paache methods.

The question was popular among the candidates with about 98% of them attempting it.

Performance was very good as about 75% of them scored above average mark.

There were no noticeable common pitfalls.

It is recommended that this tempo and performance should be sustained for future examinations.

QUESTION 6

(a) \( P = 3x^2 - 4x + 13 \)

\[
\frac{dp}{dx} = 6x - 4
\]

Elasticity of demand \( (\ell_d) = \frac{P}{x} \cdot \frac{dp}{dx} \)

\[
\ell_d = \frac{(3x^2 - 4x + 13)}{x} \cdot \frac{1}{6x - 4}
\]

at \( r = 5 \), \( \ell_d \)

\[
\ell_d = \frac{(75 - 20 + 13)}{5} \cdot \frac{1}{30 - 4}
\]

\[
= \frac{68}{5} \cdot \frac{1}{26}
\]

\[
= 0.523
\]

i.e the demand is inelastic

(b) \( TC(x) = 5q^4 - 195q^3 - 1800q^2 \)

Average Cost = \( \frac{TC(x)}{q} = 5q^3 - 1800q \)
For minimum average cost,
\[ \frac{d}{dq} \left[ \frac{T(q)}{q} \right] = 15q^2 - 390q - 1800 \]

i.e. \( 15q^2 - 390q - 1800 = 0 \)

i.e. \( (3q - 90)(5q + 20) = 0 \)

3q = 90 or 5q = -20

q = 30 or q = -4

\( \therefore \) q = 30 since q cannot be negative

\[ \frac{d^2}{dq^2} \left[ \frac{TC(r)}{q} \right] = 30q - 390 \]

= 510 at q = 30 which is positive hence

q = 30 is the minimum quantity for the average cost

If TR = 24x - 3x^2

MR = \( \frac{dTR}{dx} = 24 - 6x \)

if TC = 100 + 4x + 2x^2

MC = \( \frac{d(TC)}{dx} = 4 + 4x \)

Profit is maximised when

MC = MR

4 + 4x = 24 - 6x

24 -4 = 4x + 6x

20 = 10x

x = 2

Aliter

Profit \( \Pi = TR - TC \)

= 24x - 3x^2 - 100 - 4x - 2x^2

= -5x^2 + 20x - 100

\[ \frac{d \Pi}{dx} = -10x + 20 \]

At the t.p, \( \frac{d \Pi}{dx} = 0 \)

\( \therefore -10x + 20 = 0 \Rightarrow x = 2 \)
\[
\frac{d^2 \Pi}{dx^2} = -10
\]

Since this is less than zero
\[\therefore x = 2\] gives the maximum profit

EXAMINERS’ REPORT

The question tests candidates’ understanding of differentiation with respect to

i. Price elasticity of demand
ii. Cost minimisation
iii. Profit maximization

About 70% of the candidates attempted the question.

Performance was poor as about 60% of the candidates scored 50% or below.

The major pitfall was lack of understanding of the requirements of the question.

There will be improved performance in future if candidates

i. Improve on the quality of texts they use for preparation.
ii. Create quality time for their studies.
iii. Familiarise themselves with past questions and solutions.

QUESTION 7

i. Let \(x\) be the decision variable representing the number of ABIOK chairs produced.

Let \(y\) be the decision variable representing the number of units of TETRA chairs produced.

Objective function, \(Z = 6500x + 5,800y\)

Subject to:

\[3x + 2y \leq 450 \text{ (cutting constraint time)}\]
\[5x + 4y \leq 800 \text{ (Assembling constraint time)}\]
\[2x + 25y \leq 500 \text{ (Spraying constraint time)}\]
\[x \geq 0, y \geq 0 \text{ (Non-negative constraint)}\]
For cutting time constraint line:
\[ 3x + 2y = 450 \]
- When \( x = 0, y = 225 \)
- When \( y = 0, x = 150 \)

For assembling time constraint line:
\[ 5x + 4y = 800 \]
- When \( x = 0, y = 200 \)
- When \( y = 0, x = 160 \)

For spraying time constraint line
\[ 2x + 2.5y = 500 \]
- When \( x = 0, y = 200 \)
- When \( y = 0, x = 250 \)

ii. From the graphs,

The corner points from the feasible region are

A (0,0), B(0,200), C(100,75), D(150,0)

\[ z = 6500x + 5800y \]

For A(0,0), \[ z = 6500(0) + 5800(0) = 0 \]

For B(0,200), \[ z = 6500(0) + 5800(200) = \text{₦}1,160,000 \]

For C (100,75), \[ z = 6500(100) + 5800(75) = \text{₦}1,085,000 \]

For D(150,0), \[ z = 6500(150) + 5800(0) = \text{₦}957,000 \]

The optimal solution is to produce no unit of ABIOK and 200 units of TETRA.

**EXAMINERS’ REPORT**

The question tests candidates’ knowledge of Linear Programming (Graphical Method) to determine optimum production level.
The question was attempted by about 70% of the candidates and performance was good as about 60% of them scored 50% or above.

Common pitfalls identified are:

i. Graph sheets were not used.
ii. Scaling was poor.
iii. Solutions depicted on the graph sheets were wrongly interpreted

For improved performance, it is recommended that candidates should

i. Master the use of graph papers.
ii. Appreciation of the need to use the right scales on graph sheets.
iii. Work on their interpretational skills.
1. Which of the following is **NOT** the responsibility of an auditor?

   A. Vouch payment vouchers  
   B. Prevent non-compliance with law or regulations  
   C. Ensure compliance with accounting standards  
   D. Ensure compliance with auditing standards  
   E. Issue audit report

2. A positive external confirmation request expects respondents to

   A. Reply only if the debtor disputes the amount shown on the form  
   B. Reply directly to the management  
   C. Advise the auditor on what to do  
   D. Reply directly to the auditor whether in agreement or disagreement with the amount shown on the form  
   E. Disregard the request because the information is contained in the financial statements
3. Which of the following is **NOT** an element of a letter of representation?
   
   A. Addressed to the auditor  
   B. Addressed to management  
   C. Contains specific financial information  
   D. Dated  
   E. Signed

4. The objectives of stocktaking do **NOT** include:
   
   A. Discovery of fraud in the stock figures  
   B. Determination of the accuracy of cut-off  
   C. Ascertaining the effectiveness of internal control system over stock  
   D. Determination of the accuracy of stock valuation  
   E. Provision of the basis for checking the correctness of stock records

5. Prior to the acceptance of an engagement, the auditor should obtain a preliminary knowledge of the client. Which of the following is **NOT** what an auditor should know?
   
   A. General economic factors and industry conditions affecting the entity’s business  
   B. Number of prospective employees  
   C. The regulatory framework  
   D. The effect of new legislation, accounting or auditing pronouncements  
   E. The accounting policies adopted by the entity and changes in those policies

6. What should an auditor do when he discovers a material misstatement? He should
   
   A. Disregard the material misstatement  
   B. Correct the error before he writes the final audit report  
   C. Refer the error to the audit team for proper investigation  
   D. Issue an unqualified report
E. Communicate the misstatement to the appropriate level of management on timely basis and consider the need to report it to those charged with governance

7. The procedures outlined in an audit programme are mainly designed to
   A. Detect errors or irregularities
   B. Ensure early completion of the audit
   C. Protect the auditor against litigation
   D. Highlight movement in the accounts on a year-to-year basis
   E. Obtain audit evidence

8. Which of the following is NOT a relevant consideration for the auditor in determining whether or not a client is of high risk?
   A. The general abilities of the client’s management
   B. Evidence of management intentionally failing to record a material transaction
   C. Evidence of client’s involvement in fraudulent or illegal activities
   D. The state of the economic sector in which the client operates
   E. Diversification of the client’s business into new areas

9. The management of corporate organizations sets up internal controls in the system to ensure all of the following EXCEPT
   A. That transactions are executed in accordance with proper authorization
   B. To ensure that all debtors that failed to pay are prosecuted
   C. All transactions are promptly recorded at the correct values in the appropriate accounts
   D. Access to assets is permitted in accordance with authorised procedures
   E. Recorded assets are compared physically with existing assets at reasonable intervals and differences reconciled

10. Which of the following is NOT a method used by auditors to ascertain the system of internal control?
    A. Examining previous audit work
    B. Documenting the client’s system
    C. Interviewing client’s staff
D. Tracing transactions  
E. Obtaining the list of transactions for both purchases and creditors

11. Which of the following services is **NOT** carried out by a Computer Bureau? 

A. Parallel simulation 
B. Sales of software packages 
C. Time sharing 
D. Data preparation 
E. Designing of application packages

12. The objectives of public audit include the following **EXCEPT**

A. Ascertainment of the use of public resources 
B. Prevention of fraud and defalcations 
C. Reporting on the internal control weaknesses 
D. Promoting of government policies 
E. Alerting the executive and legislature of departures from procedures

13. Audit evidence could be generated within and outside the organization. Which of the following sources of evidence is **NOT** internal? 

A. Accounting systems 
B. Documents 
C. Suppliers 
D. Management and staff 
E. Accounting records

14. Information Technology General Control (ITGC) represents the foundation of IT

A. General controls 
B. Control structure 
C. System 
D. Governing control 
E. Communication
15. The primary function of the forensic auditor at a trial is to
   A. Present the report of his investigation
   B. Represent the management in court
   C. Give expert evidence at the trial
   D. Remain silent
   E. Counter the other party in the suit

16. The following steps are adopted by a forensic auditor in performing an audit EXCEPT to
   A. Verify compliance with regulatory, legal and evidential matters
   B. Review documents related to legal and general business functions
   C. Test the organization’s motivational and ethical climate
   D. Perform substantive and analytical review
   E. Identify questionable and exceptional transactions

17. The codes of best practice on corporate governance is treated under 3 subheadings. Which of the following options best represents the subheading?
   A. Board of Directors, Manufacturers Association and Creditors
   B. Audit Committee, Shareholders and Debtors
   C. Shareholders, Board of Directors and Debtors
   D. Board of Directors, Shareholders and Audit Committee
   E. Audit Committee, Stakeholders and Debtors

18. Due process in the public sector involves all but ONE of the following:
   A. Transparency in accounting for contracts
   B. Making use of administrative committees in approving contracts
   C. Ensuring that arrangements are in place for dealing with all audit queries
   D. Awarding contracts by the Executive after the legislature has given approval
   E. Allowing interested parties to provide input into the decision-making process
19. The operations of accounts in Federal Government Ministries, Departments and Agencies are regulated by well defined internal control instruments. Which of the following instruments is used by all the agencies?

A. Financial order  
B. Financial circulars  
C. CBN financial instructions  
D. Financial regulations  
E. General financial instructions

20. Which of the following is NOT an element of internal control as defined in auditing standards and guidelines?

A. Carrying out the business of the company in an orderly and efficient manner  
B. Ensuring adherence to management policies  
C. Ensuring adherence to continuous audit  
D. Safeguarding the assets  
E. Securing the completeness and accuracy of the records.

SECTION A: PART II  SHORT-ANSWER QUESTIONS  (20 Marks)

ATTEMPT ALL QUESTIONS IN THIS SECTION

Write the correct answer that best completes each of the following questions/statements

1. The term used in auditing as a measure of the quality of audit evidence is...........................

2. The process adopted by an auditor in obtaining representation or information of an existing condition directly from a third party is ...................................

3. Who signs the management representation letter?

4. State the cost at which an intangible asset should be carried in the balance sheet according to IAS 38.
5. The procedure designed by the auditor to determine whether appropriate control systems exist to prevent specific errors or omissions is..............................

6. The body that examines the audited accounts of the Federation is......................

7. The partner who assumes responsibility for the conduct of the audit and for issuing an auditor’s report on the financial statement on behalf of the firm is known as.............................................

8. The audit risk components that the auditor does not have control over are........... and ..............

9. The term used to describe transactions which primary purpose is to misrepresent the financial statements is...................................................

10. Another name given to value for money audit is..............................

11. The Committee of Sponsoring Organization (COSO) identifies...............components of internal control

12. The type of opinion that an auditor will express when there is a serious departure from Generally Accepted Accounting Principles (GAAP) is..................

13. What is the name given to a report that either contains an emphasis of matter paragraph or qualified opinion?

14. A sampling method that adopts selection from different groups is ..............................................

15. Another name given to financial audit is ..........................................................

16. The two main internal control areas in a computer-based system are..............................and..............................

17. Integrated Test Facilities (ITF) and Systems Control And Review File (SCARF) are two examples of..........................................................
18. In the exercise of his functions under the 1999 Constitution, the Auditor General is subject to the direction and control of ..................................

19. The controls implemented by management over a computer systems application is known as.................................................................

20. State two types of audit in the public sector.

SECTION B: ATTEMPT ANY FOUR QUESTIONS (60 Marks)

QUESTION 1
A young accounting trainee picked up a text book on auditing and came across the concept “True and fair view” and has approached you for its meaning in practice.

You are required to:

(a) Explain the concept “True and fair view” as it relates to financial reporting. (4 Marks)

(b) State any THREE Nigerian Standards on Auditing (NSAs). (6 Marks)

(c) Outline any FIVE factors affecting materiality in auditing. (5 Marks)

(Total 15 Marks)

QUESTION 2
Your audit firm has been appointed as auditors to ZOBO Nigeria Limited, a quoted company engaged in food processing. You are expected to take over from the existing auditor who has been relieved of his appointment.

You are required to:

(a) Outline the rules of professional conduct which must be observed in practice when there is a change of auditors. (6 Marks)
(b) State THREE factors each to be considered before accepting a new audit under the following headings:

(i) Legal
(ii) Ethical
(iii) Practical

(Total 15 Marks)

QUESTION 3

The audit of the accounts of a partnership is not statutorily required, but it is clear that various benefits would accrue to the firm if its accounts are voluntarily audited.

You are required to:

(a) State FOUR reasons which may necessitate the audit of accounts of a partnership firm.

(b) State FIVE important issues that you, as an auditor, would look into while auditing the books of a partnership.

(c) Draft an audit programme to audit the receipts of a school owned by a partnership.

(Total 15 Marks)

QUESTION 4

Your firm has been appointed as Auditors to ABC Limited, a private company limited by shares. A preliminary review has shown that the system of internal control is not reliable and will require the application of substantive tests in audit work.

You are required to:

(a) Explain briefly substantive tests in auditing.

(b) State EIGHT tests you will carry out on trade receivables using substantive tests approach.

(Total 15 Marks)
(c) List FOUR differences between substantive tests and compliance tests.  

(4 Marks)

(Total 15 Marks)

QUESTION 5

Computer-Assisted Audit Techniques (CAATs) refer to the use of computer software to perform audit assignments.

You are required to:

(a) Explain (CAATs)  

(2 Marks)

(b) State TWO sources of CAATs  

(2 Marks)

(c) List FOUR functions of CAATs  

(4 Marks)

(d) Itemise THREE matters to be considered when deciding to use CAATs  

(3 Marks)

(e) Outline FOUR benefits of using CAATs  

(4 Marks)

(Total 15 Marks)

QUESTION 6

One of the responsibilities of those charged with governance of a company is to determine if the application of the going concern concept in the preparation of financial statements is appropriate.

You are required to:

(a) Explain TWO audit activities that auditors perform at the planning stage that should provide auditors with information in assessing a company’s going concern status.  

(6 Marks)

(b) Enumerate SIX types of accounting information that a company may provide which are concerned with the future that may help the auditors in assessing the going concern status of the company.  

(3 Marks)
(c) Describe **THREE** steps which an auditor must take if he identifies events which cast doubt on the appropriateness of the going concern status of an entity. (6 Marks)

(Total 15 Marks)

EXAMINERS’ REPORT

The questions cover a large spectrum of the syllabus. All the candidates attempted the questions. Performance was generally above average.

PART II SHORT-ANSWER QUESTIONS

1. Appropriateness
2. External Confirmation/Third party confirmation
3. Managing Director/CEO and Financial Director
4. Cost less any accumulated amortization and any accumulated impairment losses
5. Internal Control Evaluation Questionnaire
6. Public Accounts Committee of the National Assembly
7. Audit engagement partner
8. (i) Inherent Risk and (ii) Control risk
9. Window dressing
10. Economy and efficiency audit
11. Five
12. Adverse opinion
13. Modified or Qualified Auditors report/Qualified opinion
14. Stratified sampling
15. Transaction audit
16. General Controls, Application controls
17. Computer Assisted Audit Technique/Embedded Audit Facilities
18. No authority or person
19. Application controls
20. - Compliance/regulatory audit
    - Financial audit
    - Value for money audit

EXAMINERS’ REPORT

The questions test candidates’ knowledge in various areas of the syllabus. The questions were attempted by all the candidates and performance was generally average. Candidates should study well for improved performance.

SOLUTIONS TO SECTION B

QUESTION 1

(a) Concept of “True and fair view”

(i) Meaning of “True”

- There is no statutory or judicial definition of the word “true”.
- For accountants, truth is not absolute while in the sciences, truth means a fact that is fixed and will never change.
- For accountants, the word “true” means truth in accordance with the facts available at the time of signing a financial statement or auditor’s report.
- For accountants, truth means an objective verification that the information contained in the financial statements is factual and without error.

(ii) Meaning of “fair”

- Fairness implies that relevant values have been applied impartially and objectively, considering the interest of all stakeholders.
- Fairness means that the financial statements presented create the right impression and not intended to mislead the users.
(iii) **Meaning of “True and fair”**

“True and fair view” requires compliance with the legislation and all the applicable accounting standards and regulations. Therefore, when a practitioner says that a set of accounts shows a true and fair view, it implies that:

- The auditor has requested for and obtained all information and explanations considered necessary for his audit.
- Proper books of accounts have been kept and the financial statements are in agreement with the books.
- Adequate returns have been received from branches not visited where applicable.
- The financial statements comply with statutory provisions and other relevant regulations and pronouncements.
- The assets are fairly stated, that is, they exist, are owned by the business and are properly valued.
- All the liabilities have been fully disclosed.
- There are no material errors or misstatements in the financial statements.
- Fundamental accounting concepts have been followed in the preparation of the accounts.
- The accounting policies adopted have been fully disclosed as required by International Financial Reporting Standards (IFRS).
- The financial statements have been properly presented.

(b) The current Nigerian Standards on Auditing are

<table>

9. NSA 9 Planning an Audit of Financial Statements
10. NSA 10 Identifying and Assessing the risks of material misstatement through understanding the entity and its environment
11. NSA 11 Materiality in planning and performing an audit
12. NSA 12 The auditor’s responses to assessed risks
13. NSA 13 Audit considerations relating to an entity using a service organization
14. NSA 14 Audit evidence
15. NSA 15 Audit evidence – specific considerations for selected items
16. NSA 16 External confirmations
17. NSA 17 Initial audit engagements – Opening balances
18. NSA 18 Analytical procedures
19. NSA 19 Audit sampling
20. NSA 20 Audit accounting estimates, including fair value accounting estimates and related disclosures
21. NSA 21 Related parties
22. NSA 22 Subsequent events
23. NSA 23 Going concern
24. NSA 24 Written representations
25. NSA 25 Special considerations – Audits of group financial statements (including the work of component auditors)
26. NSA 26 Using the work of internal auditors
27. NSA 27 Using the work of an auditor’s expert
28. NSA 28 Forming an opinion and reporting on financial statements
29. NSA 29 Modifications to the opinion in the independent auditor’s report
30. NSA 30 Emphasis of matter paragraphs and other matter paragraphs in the independent auditor’s report
31. NSA 31 Comparative information – corresponding figures and comparative financial statements
32. NSA 32 The auditor’s responsibilities relating to other information in documents concerning audited financial statements
33. NSA 33  Special considerations – audits of financial statements prepared in accordance with special purpose frameworks
34. NSA 34  Evaluation of misstatements identified during the audit
35. NSA 35  Special considerations – audits of single financial statements and specific elements, accounts or items of a financial statement
36. NSA 36  Engagements to report on summary financial statements

(c) The factors affecting the materiality of financial information include:

(i) The magnitude of the item compared with the overall view presented by the financial statements.
(ii) The magnitude of the item compared with the magnitude of the item in previous year’s financial statements.
(iii) Some items are always material if they are subject to statutory disclosure.
(iv) Departures from generally acceptable accounting standards may necessitate an item being termed material.
(v) The frequency of occurrence of non-recurrent items are often considered more material than recurring items of equal values.
(vi) The impact which an item has on the financial results of the enterprise, for instance, if the item can change a small profit-making enterprise to a loss-making one.

EXAMINERS’ REPORT

The question tests candidates’ knowledge on (a) True and Fair View (b) the Nigerian Standards on Auditing, and (c) matters affecting materiality. More than 75% of the candidates attempted the question. Even though the question is straightforward, the understanding of the candidates was poor. Candidates undoing was the exhibition of shallow knowledge and poor interpretation of the requirements of the question.

Candidates should study hard and be current.
QUESTION 2

(a) The auditors are expected to take the following steps:

(i) The incoming auditors should obtain authority from the client to contact the existing auditors.

The auditors should then write to the former auditors seeking information which could influence their decision as to whether or not to accept the appointment.

(iii) If the client fails or refuses to grant the new auditors permission to contact the former auditors, then they should not accept the appointment.

(iii) If permission is granted, the former auditors should communicate in writing to the new auditors stating that no matters exist why they should not accept the assignment.

(iv) Where such matters exist, the former auditors should inform the new auditors of those facts within their knowledge, which in their opinion, the new auditors should be aware of. They should feel free to discuss such matters with the new auditors.

(v) Where the former auditors do not respond within a reasonable time, the new auditors should endeavour to contact them by telephone, facsimile or e-mail. If no reply is received, they should send a final letter by registered delivery service stating that unless they receive a reply within a specified time, they will assume that no matters exist to prevent them from accepting the appointment.
(vi) If the former auditors state some matters of conflict in their reply, the new auditors should discuss with the client on such matters and thereafter decide whether to accept or reject the appointment.

(b) Factors to be considered:

(i) Legal

- The auditors must be duly appointed, for example, by members of the company at a general meeting.
- The auditors must not be an officer or servant of the company or a body corporate.
- The auditors must not be a partner or an employee of an officer of the company.
- The auditors must be a member of a recognised professional body of accountants.

(ii) Ethical

- When the acceptance of the audit will give rise to conflict of interest between the client and the auditor.
- When the audit fees constitute a significant proportion of the total fee income.
- Where the audit fees are payable subject to conditions placed by the management.
- Where the outgoing auditors have not given professional clearance.
- Where the new auditors are prevented from contacting the former auditors.
- Where the auditors take loan or advance from the client and not under normal lending conditions.
- Where the auditors have personal relationship (blood or marriage) with the Directors or Officers of the client’s company.
- Where the auditors have financial interest in the enterprise or other business relationship with the Directors of the client’s company.
- Where there is an offer of undue hospitality from the client.
(iii) Practical

- Where the auditors lack the skills and experience necessary to carry out the audit.
- Where the client is not willing to pay the fee charged by the auditors.
- Where the time available to carry out the audit work is not enough.
- Where the auditors are in doubt about the integrity of the officers of the client's company.

EXAMINERS' REPORT

The question tests the candidates' knowledge on professional ethics and the ICAN Code of Conduct. More than 50% of the candidates attempted the question, but general performance was poor, especially in part (b). Their commonest pitfall was misunderstanding of the requirements of the question. Candidates should prepare well for the examinations and exercise due care before answering questions.

QUESTION 3

(a) Reasons for the Audit of Partnership Audited Accounts:

(i) provide a convenient and reliable means of settling accounts among the partners.

(ii) reduce the possibility of dispute among partners.

(iii) constitute a reliable evidence for computing the amount due from the firm to a retiring or deceased partner.

(iv) admission of a new partner is facilitated if a set of past audited accounts is available for examination.

(v) are relied upon by banks for advancing facilities (loan & over-draft).

(vi) are generally accepted by the tax authority for computing the assessable income of each partner.
(vii) facilitate negotiation for sale or conversion of the firm to a company.

(viii) serve as moral deterrent and checks on the partners against fraudulent practices.

(b) The issues the auditor would look into while auditing the books of a partnership include:

(i) Confirmation of scope of audit
   The scope of the audit must be confirmed.

(ii) Examination of partnership deed/articles of partnership
   Partnership deed must be examined to ascertain capital contribution, profit sharing ratios, powers and responsibilities of each partner of the firm.

(iii) Examination of minutes book
   Examine the minutes book to check for the policy decisions taken by the partners.

(iv) Ascertaining the business of the partnership
   Verify that the business in which the firm is engaged is duly authorized and legally allowed by the articles of partnership.

(v) Compliance with the provisions of Partnership Act
   Ascertain that relevant provisions of the Partnership Act, as applicable, are complied with.

(vi) Ascertain that profits are shared in the agreed ratio.

(vii) Confirm if professional indemnity insurance policy is in place.

(c) Audit programme for receipts in a school owned by a Partnership

(i) Check the fees received on account of admission and compare them with admission forms.

(ii) Check the names entered in the students’ attendance register to ascertain the total number of students enrolled. This should then be compared with students’ fee register to verify the amount of fees charged and received.

   ii. Ascertain the system of recovery of fines and penalty imposed on account of late payment (if applicable).
iii. Confirm that all hostel dues have been paid by students.

iv. Vouch the rental income or interest/dividend income from investments held by the school.

v. Check grants received from government or donations received from donors (if any).

vi. Check for other incomes received by the school.

vii. Verify that the school operates a system of internal check which ensures that fees are properly raised.

viii. Check fees received by comparing it with the counterfoil of receipts and pay-in-slips through to the bank statements.

ix. Ensure that the person receiving cash is not responsible for entries in the cash book and other records.

x. Where payments are made directly into the bank, check the bank reconciliation statements prepared to ensure completeness in accounting for receipts.

xi. Review the control systems on enrolment and recordings of tuition income.

xii. Confirm if fidelity insurance policy is in place.

EXAMINERS’ REPORT

The question tests candidates’ understanding of the needs and requirements for the audit of a partnership firm.

More than 50% of the candidates attempted the question and performance was generally poor.

Most candidates performed poorly because they are not familiar with the audit programme of schools. It is recommended that candidates should expand their knowledge of various audit programmes.
QUESTION 4

(a) Substantive tests are procedures where a transaction is traced from the inception to the end of the transaction i.e. from cradle to grave. Substantive tests are audit procedures designed to detect material misstatements. Substantive test approach is usually adopted for the audit of small entities where the internal control systems are weak and there is a limited number of staff. Where there are no good controls within the system, the auditor has little or no choice but to test a large number of transactions. Substantive procedures are detailed tests of balances which are designed to obtain audit evidence to detect material misstatements in the financial statements.

(b) The substantive tests to be carried out on trade receivables will include:

(i) Obtain the debtors’ age analysis and agree the total with control ledger balance.
(ii) Test samples of the balances on the ledger and agree same with the debtors’ schedule.
(iii) Cast the debtors’ schedule to ensure correctness of the total balance.
(iv) Examine the make-up of the schedule and determine the specific transactions that make-up each debtor’s balance.
(v) Ensure that each account balance is settled in line with the credit days approved.
(vi) Ensure compliance with credit limit approved.
(vii) Enquire into reason(s) for any transfer between two accounts.
(viii) Ensure strict observance of cut-off procedure.
(ix) Consider the recoverability of the receivables.
(x) Review the reconciliation statements prepared for the customers’ accounts.
(xi) Confirm directly balances with customers’ to ensure correctness of the balances stated in the schedule.
(xii) Test post sales invoices and credit/debit notes to sales ledger accounts.

(c) **Differences between substantive tests and compliance tests**

<table>
<thead>
<tr>
<th>Substantive tests</th>
<th>Compliance tests</th>
</tr>
</thead>
<tbody>
<tr>
<td>i. Carried out in an environment where there are no reliable internal controls.</td>
<td>i. Carried out where there are strong internal controls.</td>
</tr>
<tr>
<td>ii. Involve detailed testing of transactions and balances individually.</td>
<td>ii. Are to obtain audit evidence about the effectiveness of the controls in force.</td>
</tr>
<tr>
<td>iii. Do not involve preparation of system notes and flow charts.</td>
<td>iii. Involve preparation of systems notes and flow charts.</td>
</tr>
<tr>
<td>iv. Do not involve extrapolation of the results obtained.</td>
<td>iv. Results obtained from the samples tested are extrapolated to the population as a whole</td>
</tr>
<tr>
<td>v. Materiality considerations are not important.</td>
<td>iv. Materiality consideration play a critical role in the extent of substantive tests carried out.</td>
</tr>
<tr>
<td>vi. The sample size or sample units used is lower.</td>
<td>vi. The sample size or sample units used is higher.</td>
</tr>
</tbody>
</table>

**EXAMINERS’ REPORT**

The question tests candidates’ understanding of substantive and compliance tests. More than 50% of the candidates attempted the question, but performance was below average.

The major pitfall was that candidates displayed poor understanding of substantive and compliance tests. Candidates should cover the entire syllabus and cultivate better ways to study for the examination in order to harness and present their points.
QUESTION 5

(a) **Meaning of CAATs**

Computer Aided Audit Techniques (CAATs) are audit techniques, involving computer software used to extract and analyse data and review transactions and account balances. CAATs may be used to increase the efficiency of certain audit procedures and may provide auditors with opportunities to apply certain procedures to an entire population of accounts or transactions.

(b) **Sources of CAATs**

The auditor can obtain his CAATs software from one of the following three major sources:

i. The client’s ICT Department

ii. The auditors’ ICT Department

iii. The generalized CAATs software from software vendors

(c) **Types of CAATs include:**

i. snapshots

ii. tracing

iii. mapping

iv. flowcharting

v. systems program data analysis

vi. parallel simulation and normative auditing

vii. program analysis

viii. integrated test facilities

ix. systems control and file review

(d) **Matters to consider when deciding to use CAATs include:**

i. The practicability of conventional audit tests instead of using CAATs.

ii. Whether the auditor has the requisite computer skills and knowledge of the proposed CAATs.
iii. The availability of the CAATs which the auditor plans to use.

iv. The availability of the auditor’s time

v. The availability of the CAATs software within the client’s system.

vi. The cost of CAATs in relation to potential benefits.

(e) Benefits of CAATs

i. Creation of information structure
   CAATs create information structure that cannot be accessed by manual audit procedures.

ii. Reconstruction of audit trail
   CAATs have the ability to read and analyse files speedily and accurately to generate exceptional reports.

iii. Increased audit efficiency
   CAATs increase efficiency of auditing by enabling the auditor to review large volumes of items within a short period of time thereby saving audit time.

iv. Enhancement of audit effectiveness
   CAATs enhance the effectiveness of the audit by enabling the auditor to perform consistent audit tests on large volume of items without random errors.

v. Reduction of costs
   The initial cost of setting up CAATs is very high, but once it is set up, it can be used from one audit period to the other. The running cost will reduce in later years.

vi. Improvement of data interpretation
   CAATs allow the auditor time to think through and interpret data generated as a result of the audit exercise and selection of files or items for review. Stratification and analysis is possible with CAATs.
EXAMINERS’ REPORT

The question tests candidates’ understanding of functions, uses and benefits of CAATs. Less than 50% of the candidates attempted the question and performance was poor.

The major pitfall was that candidates displayed poor understanding of the use of CAATs in auditing. It is recommended that candidates should familiarise themselves with the use of CAATs in auditing.

QUESTION 6

(a) Two audit activities at the planning stage that should provide the auditors with information in ascertaining that a company is a going concern are:
   i. Assessment of the business/inherent risk and; to a lesser extent control risk.
      Assessment of the business/inherent risk requires auditors to be knowledgeable about the company, its products, main suppliers, competitors and the environment in which it operates.
      All these characteristics are necessary pieces of information which auditors evaluate when assessing going concern status of a company.
      The assessment of control risk is important because it can give the auditors some guidance on the confidence with which they can rely on both historical and budgeted financial information.
   ii. Analytical review: this provides information about the present profitability and financial strength of the company which the auditors can use when assessing going concern status.

(b) Accounting information that a company may provide which is concerned with the future that may help auditors in assessing the going concern status of the company include:
   i. Cashflow budget or forecast
   ii. Forecast comprehensive income statement
   iii. Forecast statement of financial position.
   iv. Terms of debenture and loan agreement for future development and expansion.
   v. Minutes of shareholders’ meetings and those charged with governance regarding financial matters.
   vi. Capital commitments
- Approved but not incurred
- Approved and incurred

vii. Contingent liabilities
viii. Bank’s offer letters for loans
ix. Shareholders’ approval to raise additional equity or loan
x. Copy of business plans for future expansion

(c) If events are identified which cast doubt on the appropriateness of the going concern status, the auditors must:

i. Review the plans and consider their adequacy. If the auditors consider the plans inadequate, then the auditors’ must consider an adverse opinion in their report; if the directors will not amend the financial statements to reflect the loss of the going concern assumption.

ii. Consider if a material uncertainty exists which might need to be brought to the attention of the members in an emphasis of matter paragraph in the auditors’ report.

iii. Seek written representation from management as to its plans and the expected outcome. This must come from the top level of the company or entity’s management and be approved by the Board of Directors.

iv. If auditors are dealing with actual or potentially insolvent subsidiary company, they should confirm from the holding company for guarantees of continuing financial support – particularly where there is considerable intercompany indebtedness.

EXAMINERS’ REPORT

The question tests candidates’ understanding of going concern status of companies. More than 70% of the candidates attempted the question and performance was below average.

The major pitfall is that candidates showed lack of proper understanding of the requirements of the question. Candidates’ should endeavour to read widely for future examinations.
SECTION A: PART 1  MULTIPLE-CHOICE QUESTIONS  (20 Marks)

ATTEMPT ALL QUESTIONS IN THIS SECTION

Write ONLY the alphabet (A, B, C, D or E) that corresponds to the correct option in each of the following questions/statements.

1. The following are regarded as core objectives of a modern tax system EXCEPT:
   A. Payment of salaries
   B. Revenue generation
   C. Economic regulation
   D. Harmonisation of single market for ECOWAS
   E. Redistribution of income and wealth

2. Tertiary Education Tax is payable by all companies at the rate of 2% of ................. profit.
   A. Net
   B. Assessable
   C. Chargeable
   D. Total
   E. Attributable

3. The Revenue option to revise the assessment to actual year basis on cessation of business relates to the:
   A. Penultimate year
   B. Pre-penultimate year
   C. Pre-penultimate and penultimate year
   D. Cessation year
   E. Accounting year
4. Which of the following is **NOT** among the functions of the Technical Committee of the State Board of Internal Revenue?

A. Co-opting additional staff from within the State Service
B. Provision of general policy guidelines relating to the functions of the State Service
C. Advising the State Board on all its powers and duties
D. Attending to such other matters as may from time to time be referred to it by the Board
E. Consideration of all matters that may require professional and technical expertise and make recommendations to the State Board of Internal Revenue

5. Taxes and levies collectible by State governments exclude

A. Stamp duties on instruments executed by individuals
B. Pools betting and lotteries, gaming and casino taxes
C. Slaughter slab fees
D. Road taxes
E. Withholding tax (individuals only)

6. Which of the following is a non-investment income from which Withholding Tax is deductible?

A. Dividend
B. Rent
C. Royalty
D. Interest
E. Consulting services

7. The minimum number of members of the Tax Appeal Tribunal that must be present in a sitting to hear an appeal is

A. Six
B. Ten
C. Seven
D. Three
E. Five
8. A Company’s Tax Clearance Certificate shall show the following **EXCEPT**:

   A. Tax paid  
   B. Total profit  
   C. Turnover  
   D. Expiry date  
   E. Adjusted profit

9. The following incomes are subject to Withholding Tax in Nigeria **EXCEPT**

   A. Commission  
   B. Professional fees  
   C. Rent  
   D. Salary  
   E. Management fees

10. Current year loss relief is applicable to ..................... only.

    A. Insurance companies  
    B. Telecommunication companies  
    C. Individuals  
    D. Limited liability companies  
    E. Petroleum companies

11. Under the Companies Income Tax Act Cap C21 LFN 2004 (as amended), which of the following donations is **NOT** allowable for tax purposes?

    A. Donations to political parties  
    B. Donation to National Youth Council of Nigeria  
    C. Donations made out of profit  
    D. Donations not of a capital nature  
    E. Donations below ten percent of the company’s total profit
12. Investment Allowance is granted on Qualifying Capital Expenditure incurred on

A. Industrial building
B. Housing estate expenditure
C. Mining expenditure
D. Research and development expenditure
E. Plant, machinery and equipment

13. Which of the following is NOT an example of an Indirect Tax?

A. Value Added Tax
B. Import Duties
C. Capital Gains Tax
D. Excise Duties
E. Sales Tax

14. The Personal Income Tax (amendment) Act 2011 listed the following as “tax exempt” EXCEPT

A. National Housing Fund contribution
B. Overtime
C. National Health Insurance Scheme contribution
D. Life assurance premium
E. Gratuities

15. An example of indirect tax on spending expected to be borne by the final consumer of goods and services is known as:

A. Companies Income Tax
B. Commission Tax
C. Value Added Tax
D. Capital Gains Tax
E. Petroleum Profits Tax
16. The power to assess, collect and administer taxes on limited liability companies under the Companies Income Tax Act Cap C21 LFN 2004 is vested in the

A. Joint Tax Board  
B. Federal Inland Revenue Service  
C. State Board of Internal Revenue  
D. Stamp Duties office  
E. Education Tax Fund

17. Under the Value Added Tax Act Cap V1 LFN 2004 (as amended), the goods and services which are categorised as zero rated will **NOT** be subjected to:

A. Input Tax  
B. Education Tax  
C. Capital Gains Tax  
D. Pioneer Tax  
E. Output Tax

18. In pursuance of the relevant section of the Stamp Duties Act Cap S8 LFN 2004 (as amended), which of the following duties is **NOT** among the four main technical duties of the Commissioner for Stamp Duties?

A. Control of archives where copies of stamped documents are kept  
B. Assessment of instruments  
C. Stamping of assessed instruments  
D. Adjudication  
E. Custody of dies

19. The following are the steps involved in creating a named range **EXCEPT:**

A. Select the range of cells you want to name including the row or column label  
B. Select defined option from the name from sub-menu on the insert menu  
C. Use of IF function  
D. Click on the add button to add the row  
E. The range of cells to which the name refers, is displayed in the “refers to” field
20. A formula in Excel spreadsheet begins with one of the following options:
   
   F. + 
   G. = 
   H. ? 
   I. & 
   J. “

SECTION A: PART II SHORT-ANSWER QUESTIONS (20 Marks)

ATTEMPT ALL QUESTIONS IN THIS SECTION

Write the correct answer that best completes each of the following questions/statements:

1. The sum total of an employee’s basic salary and other entitlements without other deductions is referred to as .........................

2. What is the time limit of the notice required of an individual taxpayer to revoke an earlier option of election on commencement of business?

3. An employment, the duties of which are wholly performed outside Nigeria, save during any temporary visit of the employee to Nigeria is .......................

4. Alhaji Mombo, an employee of Eniso Stores, is on an annual salary of ₦30,000. How much will he pay as tax for the year?

5. The relevant tax authority responsible for the collection of taxes of members of the Nigerian Army residing in Lagos State of Nigeria is .........................

6. In relation to deduction of tax from employees’ emoluments, what is the period stipulated for the remittance of such tax deducted to the relevant tax authority?

7. When a partnership is converted into a limited liability company ................ rules will apply to the partners up to the date of conversion.

8. An example of taxes collectible under customary laws is .........................
9. A tax structure where a taxpayer with assessable income of ₦1,000,000, pays tax of ₦100,000, while a tax payer with income of ₦5,000,000 pays tax of ₦500,000, is a form of ......................... tax.

10. What is the time limit within which a newly incorporated company is expected to register with the Federal Inland Revenue Service?

11. Assume Portair Hotel Limited paid a dividend of ₦50 million for the year ended 31 December 2011, while its total profit for 2012 assessment year (based on the accounts to 31 December 2011) was ₦30 million. In accordance with Section 19 of the Companies Income Tax Act CAP C21 LFN 2004 (as amended), determine the income tax payable in 2012 year of assessment.

12. Assets which collectively constitute a pension fund are called .........................

13. The aggregate of the properties possessed by a person, including his goods, money or other types of property is known as .........................

14. Calculate the Income Tax payable and the Tertiary Education Tax payable for 2013 year by a company with an adjusted profit of ₦360,000 and capital allowances claim of ₦60,000.

15. State the formula for calculating the Adjusted Profit ratio percentage of a company engaged in shipping or air transport business.

16. What are the accounting entries required to record tax payable by a limited liability company for any year of assessment?

17. Who is the Chairman of Value Added Tax Technical Committee?

18. Which of the three variants of VAT is widely used by many countries including Nigeria?

19. An expression that can be evaluated to either “TRUE OR FALSE in Advanced Excel functions is known as ........................

20. A Computer simulation mechanism that simulates a paper worksheet is known as ........................
SECTION B: ATTEMPT ANY FOUR QUESTIONS (60 Marks)

QUESTION 1

James Nigeria Limited was incorporated on 7 October 2006 and commenced business in January 2008. The adjusted profits for the relevant years of assessment are as follows:

N

| Year ended | 31/12/2008 | 340,000 |
|           | 31/12/2009 | 540,000 |
|           | 31/12/2010 | 620,000 |
|           | 31/12/2011 | 610,000 |
|           | 31/12/2012 | 750,000 |

The company received an income tax assessment of N175,000 on 1 June 2012, based on the audited financial statements for the year ended 31 December, 2011. Payments were made by the company as follows:

N

<table>
<thead>
<tr>
<th>Date</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>30 June 2012</td>
<td>25,000</td>
</tr>
<tr>
<td>1 October 2012</td>
<td>50,000</td>
</tr>
<tr>
<td>30 November 2012</td>
<td>100,000</td>
</tr>
</tbody>
</table>

The Chief Accountant of the company wrote a letter to the Area Tax Controller requesting for payment of the assessment by instalment but unfortunately, he reneged on his promise.

You are given the CBN Monetary Policy Rate (MPR) plus spread at 18% per annum for the relevant period.
You are required to:

Compute the interest and penalty on late payment of assessment in accordance with Section 32 (1) (B) and (C) of Federal Inland Revenue Service (Establishment) Act 2007.

(15 Marks)

QUESTION 2

(a) Nigerian taxation in its present form can be traced to the establishment of the British Colony of Lagos on 6 August 1861, and subsequent amalgamation of Southern and Northern Protectorates of Nigeria in 1914.

You have been appointed Consultant to a foreign-based investor.

You are required to:

State any FIVE sources of Nigerian tax laws and practices. (5 Marks)

(b) As a result of increase in government expenditure due to increase in population, inflation and development of the country, financing these expenditure through proceeds from crude oil and non oil export is becoming inadequate. Successive governments in Nigeria are now widening the net of their Internally Generated Revenue (IGR).

You are required to:

State SIX notable legislations enacted by the Federal Government of Nigeria to address the challenges of tax collection. (6 Marks)

(c) Tade John Limited is a company incorporated in Nigeria with two directors, Layoka Sule and John Tade. It is mandatory that the parties involved must register with relevant tax authorities.

You are required to:

(i) Identify the relevant tax payers.

(ii) State the relevant tax authorities responsible for the registration of the various tax payers. (4 Marks)

(Total 15 Marks)
QUESTION 3

Sweet Boom Nigeria Limited is a company incorporated in Nigeria with its head office located in Victoria Island, Lagos. The company specialises in the importation of Green Stone and Hardwood for manufacturing its products. The company makes up its financial statements to 30 September annually. The financial results from its operations are as follows:

<table>
<thead>
<tr>
<th>Year ended</th>
<th>Profit</th>
</tr>
</thead>
<tbody>
<tr>
<td>30 September 2007</td>
<td>N1,000,000</td>
</tr>
<tr>
<td>30 September 2008</td>
<td>N1,500,000</td>
</tr>
<tr>
<td>31 December 2009 (15 months)</td>
<td>N2,750,000</td>
</tr>
<tr>
<td>31 December 2010</td>
<td>N3,250,000</td>
</tr>
<tr>
<td>31 December 2011</td>
<td>N3,500,000</td>
</tr>
</tbody>
</table>

You are the newly employed Senior Inspector of Taxes and the file of the company has been forwarded to your office with the above details.

You are required to:

(a) Compute the assessable profits and the tax payable for the relevant tax years. (12 Marks)

(b) State the options available to a tax payer on commencement of business if he decides to exercise his right of election. (3 Marks)

(Total 15 Marks)

QUESTION 4

Mr. Dan Onyechi retired as a Director in the Federal Ministry of Oil Mining and Resources on 31 December 2011. On retirement, he was paid a gratuity of N3,000,000.

On 1 January 2012, he secured an employment with OOU Limited, a manufacturer of New Dexi products for hearing-impaired individuals, on a salary of N7,200,000 per annum. Mr. Dan Onyechi is married with two wives and five children.
The following information was also provided at the end of his first year in his new employment:

(i) The eldest son, Buchi, is gainfully employed with Tom-Tom Bank Limited.

(ii) The company provides Mr. Dan Onyechi with an official car – Toyota Corolla with a market value of ₦3,500,000.

(iii) The company pays ₦720,000 per annum on his official accommodation.

(iv) Mr. Onyechi has a life assurance policy with Tinko Assurance Plc. The sum assured is ₦500,000, while premium paid is ₦5,000 per month.

(v) He contributed ₦15,000 monthly to an approved Pension Scheme.

(vi) He spent ₦15,000 during the year for the upkeep of his two aged parents who have no source of income.

You are required to:

Compute Mr. Dan Onyechi’s monthly and annual tax liabilities for the relevant year of assessment. 

(Total 15 Marks)

QUESTION 5

(a) Chief Jodab is worried about the poor financial results of his trading business in recent years. One of his friends, who is a lawyer, had discussed with him about the provisions of Personal Income Tax Act 2004 (as amended), relating to loss reliefs.

You are required to:

State any TWO ways in which Chief Jobab can claim loss relief. (3 Marks)

(b) Barryjay Limited has been in business for many years preparing its accounts to 31 December each year. An extract from its financial records for year ended December 2010, is as follows:

<table>
<thead>
<tr>
<th>₦’000</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net profit as per accounts</td>
</tr>
</tbody>
</table>

After charging:
Donation to staff club 1,500
Office stationery 800
Provision for bad debts (General) 1,200
Depreciation of fixed assets 4,500
Loss on sale of fixed assets 2,250
Interest on loan 9,000
Franked investment income 1,300

The following additional information is given:
(i) Unrelieved losses brought forward is ₦3, 150,000
(ii) Capital allowances granted to the company amounted to ₦32, 250,000

You are required to:
Compute the taxes payable for the relevant year of assessment. (12 Marks)
(Total 15 Marks)

QUESTION 6

(a) The Federal Government of Nigeria is the only competent authority to impose, charge and collect duties on instruments executed by corporate entities as specified in the schedule to Stamp Duties Act Cap S8, LFN 2004.

You are required to:
List any TEN instruments that are required by law to be stamped. (5 Marks)

(b) Understanding Excel function is becoming a pre-requisite for using electronic spreadsheet in tax computations.

You are required to:
State any FOUR basic principles and concepts of Excel function. (4 Marks)
(c) When payment is made to the bank or the Withholding Tax section of the Revenue office, each Withholding Tax cheque must be accompanied with a payment schedule.

You are required to:

State any SIX information contained in a payment schedule.

EXAMINERS’ REPORT

The questions test candidates’ understanding of the various areas of the syllabus.

Performance was above average. Candidates demonstrated a good understanding of the questions.

It is recommended that candidates should always cover the entire syllabus for better performance.

PART II SHORT-ANSWER QUESTIONS

1. Gross emoluments
2. Twelve months after the end of third year of assessment
3. Foreign employment
4. ₦300 (1% of ₦30,000)
5. Federal Inland Revenue Service
6. Within 10 days after the end of the month under consideration
7. Cessation
8. Isakole, Osusu Nkwu, Zakkat or Jangali
9. Proportional
10. 6 months after end of 1st Accounting period or eighteen months after incorporation, whichever is earlier
11. ₦15 million (30% of ₦50 million)
12. Pension Fund Assets
13. Estate
14. Companies income tax payable - ₦90,000; Tertiary Education Tax - ₦7,200
15. Adjusted Profit Ratio (%) = $\frac{\text{Profit or Loss before Depreciation}}{\text{World Wide Income}} \times 100$

16. Debit Profit and Loss Account, Credit Companies Income Tax Account

17. The Chairman of Federal Inland Revenue Service

18. The Consumption Variant

19. Logical Text

20. Spreadsheet

**Tutorial**

14. - Companies Income Tax \((N360,000 - N60,000) \times 30\% = N90,000\)
   - Tertiary Education Tax 2\% of N360,000 = N7,200
   - In practice adjusted profit is taken to mean assessable profit

**EXAMINERS’ REPORT**

The questions test candidates’ understanding of the various areas of the syllabus. Performance was good. Candidates demonstrated a good understanding of the questions.

Candidates are advised to cover the entire syllabus.
SECTION B

SOLUTION 1

JAMES NIGERIA LIMITED

COMPUTATION OF INTEREST AND PENALTY ON LATE PAYMENT OF ASSESSMENT
IN ACCORDANCE WITH SECTION 32(1)(B) AND (C) OF FIRS ACT 2007

<table>
<thead>
<tr>
<th></th>
<th>Total</th>
<th>Penalty</th>
<th>Interest</th>
</tr>
</thead>
<tbody>
<tr>
<td>Additional Income Tax Assessment</td>
<td>175,000</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Amount paid within stipulated period</td>
<td>(25,000)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Amount subject to penalty</td>
<td>150,000</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Penalty due @ 10%</td>
<td>15,000</td>
<td>15,000</td>
<td>-</td>
</tr>
</tbody>
</table>

2nd Payment - 1/10/12

50,000

Period of default (1/8/12 - 30/9/12) - 2 months
Interest payable (₦150,000 x 18% x 2\(\frac{1}{12}\)) | 4,500 | - | 4,500
Balance payable (₦150,000 - ₦50,000) | 100,000 | |

3rd Payment - 30/11/2012

100,000

Period of default (1/8/12 - 30/11/2012) - 4 months
Interest payable (₦100,000 x 18% x 4\(\frac{1}{12}\)) | 6,000 | - | 6,000
Balance payable (₦100,000 - ₦6,000) | 25,500 | 15,000 | 10,500

Notes
1. Section 85(1)(b) of Companies Income Tax Act Cap C 21 LFN 2004, states, inter alia, that “the tax due shall carry interest at bank lending rate from the date when the tax becomes payable until it is paid ………………..”. 
2. The question is, when will an assessment become payable?
Section 77(2) states that “tax charged by any assessment which is not or has not been the subject of an objection or appeal by the company shall be payable (after the deduction of any amount to set-off for the purposes of collection under any provision of this Act) at the place stated in the notice of assessment within two months after service of such notice upon the company”.

3. Arising from the above, calculation of interest payable should be from when the tax becomes payable, that is, two months after service of notice of assessment.

4. Candidates are advised to note that the date of notice of assessment could be different from the date of service of same.

EXAMINERS’ REPORT

The question tests candidates’ understanding of instalmental payment by a tax payer. Very few candidates attempted this question and performance was very poor. The commonest pitfall was the inability of candidates to compute penalty and interest on late payment of assessment. It is recommended that candidates should pay attention to the rules governing payment of tax by instalment including calculation of penalty and interest for defaulters.

SOLUTION 2

(a) SOURCES OF NIGERIAN TAX LAWS

These are:

(i) Practices of the Revenue
These are various actions taken by Revenue in the treatment of issues arising during the course of its operations from year to year

The constitution serves as the basis of imposition of tax on Nigerian citizens

(iii) Department and official circulars:
These are the guidelines, circulars issued by the Federal Inland Revenue Service or any other relevant tax authority in the administration of the taxes
Opinions of income tax experts and authors recognised by courts of law

Court judgements which decide income tax cases and establish income tax principles which are binding and must be followed in similar cases until overruled

The various income tax laws, the State and Federal laws including the Federal Government Acts and the State Government laws

Customary laws:
These are the native laws and customs governing the taxation of incomes, goods and properties of persons or communities within an ethnic group

(b) NOTABLE LEGISLATIONS ENACTED TO ADDRESS TAX PROBLEMS IN NIGERIA

The various legislations enacted to address tax problems in Nigeria include the following:

(i) Personal Income Tax (Amendment) Act, 2011
(ii) Companies Income Tax Act Cap C21 LFN 2004 (as amended)
(iv) Capital Gains Tax Cap C1 LFN 2004
(v) Value Added Tax Cap VI LFN 2004 (as amended)
(vi) Tertiary Education Tax Act Cap E4 LFN 2004
(vii) Stamp Duties Act Cap S8 LFN 2004
(viii) National Information Technology Development Agency Act 2007

(c) (i) RELEVANT TAX PAYERS
- Trade John Ltd.
- Lajoka Sule
- John Tade
- Employees of Trade John Ltd.

(ii) Relevant tax authorities to be responsible for registration of the tax payers are:

<table>
<thead>
<tr>
<th>Tax payers</th>
<th>Tax Authorities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trade John Ltd.</td>
<td>Federal Inland Revenue Service</td>
</tr>
<tr>
<td>Lajoka Sule</td>
<td>State Board of Internal Revenue</td>
</tr>
<tr>
<td>John Tade</td>
<td>State Board of Internal Revenue</td>
</tr>
<tr>
<td>Employees of Trade John Ltd.</td>
<td>State Board of Internal Revenue</td>
</tr>
<tr>
<td></td>
<td>unless they are resident in Abuja</td>
</tr>
</tbody>
</table>
EXAMINER’S REPORT

This question tests candidates’ knowledge of sources of tax laws, relevant legislations to address, challenges of tax collection and relevant tax authorities.

Performance was above average. A good percentage of the candidates demonstrated thorough understanding of the question. The commonest pitfall was the inability of candidates to list the sources of Nigerian Tax Laws.

It is recommended that candidates should pay attention to the theories and principles of tax laws.

SOLUTION 3

SWEET BOOM NIGERIA LIMITED

(a) COMPUTATION OF ASSESSABLE PROFITS AND TAX PAYABLE FOR THE RELEVANT YEARS OF ASSESSMENT

<table>
<thead>
<tr>
<th>Year of change – 2009 (Based on old date)</th>
<th>Assessable Profit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basis Period</td>
<td>N</td>
</tr>
<tr>
<td>2009 1/10/2007 - 30/9/2008</td>
<td>1,500,000</td>
</tr>
<tr>
<td>2010 1/10/2008 - 30/9/2009 12/15 X N2,750,000</td>
<td>2,200,000</td>
</tr>
<tr>
<td>2011 1/10/2009 – 30/9/2010 (3/15 X N2,750,000) + (9/12 X N3,250,000)</td>
<td>2,987,500</td>
</tr>
<tr>
<td>(N550,000 + N2,437,500)</td>
<td>6,687,500</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Year of Assessment</th>
<th>Basis Period</th>
<th>Assessable Profit</th>
<th>Income Tax</th>
<th>Education Tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>2009</td>
<td>1/1/2008 – 31/12/2008 (9/12 x N150,000) + (3/15 x N2,750,000)</td>
<td>1,675,000</td>
<td>502,500</td>
<td>33,500</td>
</tr>
</tbody>
</table>
2010  
1/1/2009 – 31/12/2009  
$2,200,000  
660,000  
44,000  
\(\frac{12}{15} \times \text{N2,750,000}\) 
2011  
1/1/2010 – 31/12/2010  
$3,250,000  
975,000  
65,000  
\(\frac{7,125,000}{2,137,500}\)  
\(142,500\)

**Decision:** The computation based on the New Accounting date will be chosen by the Tax Authority as it produces higher total assessable profits for the relevant years.

**Assumptions**

(i) Given the fact that capital allowances were not provided in the question, assessable profits were assumed to be total profits.

(ii) Computation of tax payable for each of the relevant years of assessment will be limited to assessable profits based on the new accounting date.

**OPTIONS AVAILABLE TO A TAX PAYER ON COMMENCEMENT OF BUSINESS IF HE DECIDES TO EXERCISE HIS RIGHT OF ELECTION**

The tax payer has the right of election to have the assessable profits for the second and third assessment years revised to actual basis with the following conditions.

i. Notice of intention to exercise the right of election to the Federal Inland Revenue Service in writing.

ii. The notice must be given within two years, after the end of the second year of assessment

iii. The election to be assessed on actual must be for the second and third years together and not for one or the other.

iv. Notice to revoke the right of election must be given in writing within twelve months, after the end of the third year of assessment, if the tax payer so decides.
EXAMINERS’ REPORT

The question tests candidates’ understanding of assessment of tax payers when there is a change of accounting date and on commencement of business.

Candidates’ performance was above average. The commonest pitfall was the candidates’ inability to state the rules to be followed when a company intends to exercise the right of election.

Candidates are advised to pay attention to situations when tax payers have abnormal basis periods.

SOLUTION 4

DAN ONYECHI

COMPUTATION OF TAX LIABILITY FOR 2012 YEAR OF ASSESSMENT

<table>
<thead>
<tr>
<th></th>
<th>₦</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gratuity</td>
<td>3,000,000</td>
</tr>
<tr>
<td>Salary</td>
<td>7,200,000</td>
</tr>
<tr>
<td>Benefits in kind:</td>
<td></td>
</tr>
<tr>
<td>Official car</td>
<td>175,000</td>
</tr>
<tr>
<td>Company accommodation</td>
<td>720,000</td>
</tr>
<tr>
<td><strong>Gross emoluments</strong></td>
<td>8,095,000</td>
</tr>
<tr>
<td>Less Reliefs</td>
<td></td>
</tr>
<tr>
<td>(i) Consolidated Relief Allowance</td>
<td>1,819,000</td>
</tr>
<tr>
<td>(ii) Life Assurance Relief</td>
<td>60,000</td>
</tr>
<tr>
<td>(iii) Contribution to Pension Scheme</td>
<td>180,000</td>
</tr>
<tr>
<td><strong>Chargeable Income</strong></td>
<td>6,036,000</td>
</tr>
</tbody>
</table>
Calculation of tax payable

<table>
<thead>
<tr>
<th>Category</th>
<th>Amount</th>
<th>Rate</th>
<th>Tax Payable</th>
</tr>
</thead>
<tbody>
<tr>
<td>First 300,000</td>
<td>@ 7%</td>
<td>N21,000</td>
<td></td>
</tr>
<tr>
<td>Next 300,000</td>
<td>@ 11%</td>
<td>N33,000</td>
<td></td>
</tr>
<tr>
<td>✓ 500,000</td>
<td>@ 15%</td>
<td>N75,000</td>
<td></td>
</tr>
<tr>
<td>✓ 500,000</td>
<td>@ 19%</td>
<td>N95,000</td>
<td></td>
</tr>
<tr>
<td>✓ 1,600,000</td>
<td>@ 21%</td>
<td>N336,000</td>
<td></td>
</tr>
<tr>
<td>✓ 2,836,000</td>
<td>@ 24%</td>
<td>N680,640</td>
<td></td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>6,036,000</strong></td>
<td></td>
<td><strong>N1,240,640.00</strong></td>
</tr>
</tbody>
</table>

Total tax payable = N1,240,640.00

Monthly tax deduction = \( \frac{N1,240,640}{12} = N103,386.67 \)

Note:

Section 3(1b) of Personal Income Tax (Amendment) Act, 2011, defines Income chargeable as “any salary”, wage, fee, allowance or premiums, benefits or other perquisites allowed, given or granted by any person to any temporary or permanent employee ………….”

EXAMINERS’ REPORT

The question tests candidates understanding of the taxation of individuals in employment.

The performance was poor due to candidates’ inability to display knowledge of the effects of the recent changes in the rules governing the taxation of individuals.

It is advised that candidates should be fully abreast of the provisions of the Personal Income Tax (Amendment) Act, 2011.
SOLUTION 5

(a) **THREE WAYS IN WHICH AN INDIVIDUAL CAN OBTAIN LOSS RELIEF**

Chief Jodab can obtain loss relief in the following ways:

(i) By setting off the loss against other incomes of the year of assessment in which the loss was incurred (i.e. current year loss relief);

(ii) By setting off the loss against incomes of the subsequent years from the same trade, business, profession or vocation in which the loss was incurred (i.e. carry forward loss relief); and

(iii) By a combination of methods (i) and (ii) above.

(b) **BARRYJAY LIMITED**

**COMPUTATION OF INCOME TAX LIABILITIES FOR 2011 YEAR OF ASSESSMENT**

\[
\begin{array}{lrr}
\text{N'000} & \text{N'000} \\
\hline
\text{Net profit per accounts} & 37,500 \\
\text{Add: Non allowable expenses} & \\
\text{Donation to staff club} & 1,500 \\
\text{General Provision for bad debts} & 1,200 \\
\text{Depreciation of fixed assets} & 4,500 \\
\text{Loss on sale of fixed assets} & 2,250 \\
\hline
\text{Less: Franked investment income} & 1,300 \\
\text{Adjusted profit} & 46,650 \\
\text{Less: Unrelieved loss b/f} & 3,150 \\
\text{Less: Capital Allowances} & 32,250 \\
\text{Restricted to: (66^{2}/3 \times N'45,650)} & 30,433 \\
\text{Unrelieved capital allowances c/f to 2012} & 30,433 \\
\text{Total profit} & 12,067 \\
\end{array}
\]
Income tax payable @ 30% x N =
N12,067,000

Education tax payable @ 2% x =
N45,650,000

Total tax liability
N4,533,100

EXAMINERS’ REPORT

The question tests candidates’ knowledge of rules governing loss reliefs and the computation of tax payable by companies.

Candidates displayed a good understanding of the question. Performance of the candidates was above average. The commonest pitfall was the poor presentation of the computation.

It is advised that candidates should pay attention to the standard method of presentation of tax computations.

SOLUTION 6

(a) INSTRUMENTS THAT ARE REQUIRED BY LAW TO BE STAMPED

xx. Other Conveyances
xxi. Capital of Companies

(b) BASIC PRINCIPLES AND CONCEPTS OF EXCEL FUNCTION

Some basic principles and concepts of Excel Software are:
- Referencing
- Relative
- Partial (column or row)
- Absolute
- Creating of View
- Use of IF function
- Excel comparison operator
- Naming function

(c) CONTENTS OF WITHHOLDING TAX PAYMENT SCHEDULE

(i) Names of tax payers who suffered the deductions
(ii) Taxpayers addresses
(iii) The nature of their activities/services and period covered
(iv) The tax file numbers (tax identification number) (TIN)
(v) The total amount payable
(vi) The rate of tax applied
(vii) The amount of tax withheld
(ix) The balance paid to the tax payer
(x) The tax contract for which returns were being made
(xi) The date of payment
(xii) The cheque number and date

EXAMINERS’ REPORT

The question tests candidates’ understanding of rules relating to stamp duty, Information Technology and contents of a Withholding Tax schedule.

Most candidates performed below average. The commonest pitfall was lack of understanding of instruments to be stamped and the Excel office tool.

Candidates are advised to pay attention to laws relating to stamp duties and information technology.

1. Which of the following must the sender and receiver share for communication to be possible?
   A. Assets and liabilities
   B. Responsibilities and roles
   C. Language and frame of reference
   D. Feedback
   E. Grapevine

2. Which of the following is NOT expected to be included in the conclusion of a report?
   A. Ideas left out in the report’s analysis
   B. Indications from data gathered from the field
   C. Outcomes and consequences of findings
   D. Closure on arguments and analysis in the body of the report
   E. Final judgements on issues covered in the report

3. The following are characteristics of the title of a report EXCEPT
   A. Clarity
   B. Cluster
   C. Conciseness
   D. Preciseness
   E. Correctness
4. What barrier is in operation where people do NOT express displeasure despite glaring misconduct and compromises?
   A. An obvious barrier
   B. A conceptual barrier
   C. A communication barrier
   D. An ethical barrier
   E. An ideal barrier

5. The following are feedback sources EXCEPT
   A. Audit of quality assurance process
   B. Staff appraisal
   C. Quarterly sales reports
   D. Responses to questions
   E. Codes for logging into a site

6. Which of the following do feedback facilities rely on?
   A. Task completion
   B. Error and distortion correction
   C. Peer review
   D. Electronic presentations
   E. Sensory barriers

7. Which of the following does NOT affect sender’s and receiver’s interpretation of messages?
   A. Mood
   B. Values
   C. Context
   D. Non-verbal cues
   E. Undecoded messages
8. The XYZ Company reported the mean and median sales of Company A and Company B respectively. The mean and the median are: $\overline{X}_A = 25, \overline{X}_B = 25, \text{Med}_A$ and $\text{Med}_B = 25$.

This implies that:

A. The distribution of sales is symmetrical
B. The distribution of sales is asymmetrical
C. Company A is better than Company B
D. Company B is better than Company A
E. Company A and B are different from each other

9. The following are **NOT** measures of central tendency **EXCEPT**

A. Coefficient of variation
B. Range
C. Variance
D. Standard deviation
E. Mean

10. Several potential relationships between values of a dependent variable and an independent variable are depicted by:

A. Regression
B. Scatter plot
C. Correlation
D. Contingency
E. Goodness of fit

11. What is the relationship that exists between the response variable and the explanatory variable in which response and the explanatory variables increase at the same rate?

A. Negative perfect
B. Positive perfect
C. Positive
D. Negative
E. Nil
12. The following are necessary steps required in testing a hypothesis EXCEPT
   A. Statement of the hypothesis
   B. Statement of the decision rule
   C. Recommendation and policy implication
   D. Determination of the critical value
   E. Specification of suitable test statistic

13. In a Survey Research, which of the following methods is NOT suitable for data collection?
   A. Extraction from existing records
   B. Participatory observation
   C. Use of questionnaire
   D. Personal interview
   E. Focus group interview

14. In which of the following sampling techniques is the study population divided into different homogeneous classes?
   A. Cluster
   B. Systematic
   C. Simple random
   D. Stratified
   E. Quota

15. In which of the following research studies are the independent variables controlled to minimise their effects on the dependent variable?
   A. Laboratory experiment
   B. Field survey
   C. Correlational research
   D. Ex-post-facto research
   E. Field experiment
16. Research studies are conducted in organisations for the following reasons EXCEPT
   A. Assist management in decision making
   B. Widen the horizon of knowledge
   C. Increase the level of uncertainty
   D. Provide solutions to complex business problems
   E. Establish relationship between variables

17. The problems and gaps identified which necessitate the conduct of a particular research study are stated in
   A. Background to the study
   B. Scope of the study
   C. Statement of the problem
   D. Significance of the study
   E. Operational definition of terms

18. The hypothesis stated in a research study must have relationship with the
   A. Research questions
   B. Limitation of the study
   C. Method of data collection
   D. Style of referencing
   E. Identification of the problem

19. What is the term “advertisement” in the research topic “the impact of advertisement on organisation’s performance”?
   A. Explained variable
   B. Explanatory variable
   C. Endogenous variable
   D. Dependent variable
   E. Constant

20. Which of the following is NOT a good characteristic of sample?
   A. Representativeness of the population
   B. Sample size should relate to the population size
C. Contains the major features in the population  
D. Invalidates the population parameter  
E. Should be well defined

SECTION A: PART II  SHORT-ANSWER QUESTIONS  (20 Marks)

ATTEMPT ALL QUESTIONS IN THIS SECTION

Write the correct answer that best completes each of the following questions/statements:

1. The communication barrier in which ambiguity is the problem is .................
2. The purpose of communication in which the sender aims to convince his audience is ......................
3. The principle of communication which the sender applies by making his message error-free, accurate and true to his intention is ......................
4. Unverified information within a communication system is ......................
5. A body of words, rules and systems used by a community, nation, and race is called ......................
6. The method of communication prevalently used for face-to-face communication is ......................
7. A self-contained communication system that processes messages by receiving, storing, retrieving and decoding information is ......................
8. A measure of variation that tends to overcome the range of susceptibility to extreme value is called ......................
9. The clustering of data around a middle value is called ......................
10. A measure of central tendency that takes into account the importance of each value in a given set of data is referred to as
11. Assume that there are 56,000 auditors in Nigeria. The proportion of auditors on each week day is 4/25 and each weekend is 3/25. The number of auditors on a weekday is .........................

12. Kate Turabian Style of referencing rests mainly on the use of ....................... and ........................

13. A general pattern of organisation and arrangement of research report is called ....................... 

14. A research instrument used for collecting data is included in the .........................

15. At the end of a research work, reference list is arranged ...................

16. A scientific way of validating hypothesis for policy analysis requires ................... statistics.

17. Parametric and non-parametric statistics are based on which type of sampling?

18. A statistical tool used to determine whether or not there is a relationship between two or more variables is ........................

19. Every recommendation must be based on a particular ......................... of the study undertaken.

20. Creativity and originality of research can be developed from similar existing research through the use of ........................

SECTION B: ATTEMPT ANY FOUR QUESTIONS (60 Marks)

QUESTION 1

A committee has been set up by the President, Institute of Chartered Accountants of Nigeria (ICAN) to:

(i) Investigate reasons why there is increase in the number of candidates seeking to become professional accountants through ICAN.

(ii) Collate the needs of students taking ICAN professional examinations.
(iii) State the challenges faced by candidates taking ICAN examinations.

(iv) Make recommendations to reposition ICAN to consolidate her position as the leading professional accounting body in Nigeria and Africa.

The committee has been given eight weeks to undertake this assignment.

**Required:**

As the Secretary of the committee, present the outline/structure of your report.  

**(15 Marks)**

**QUESTION 2**

A recent survey report in your company has identified:

(i) Workers’ attitude
(ii) Language
(iii) Timing

as communication factors responsible for the low productivity of the company.

**You are required to:**

Identify and explain briefly the relevant issues in relations to the **THREE** factors stated in the report in order to improve the company’s productivity.

**(15 Marks)**

**QUESTION 3**

The Nigeria Crime Fighter magazine reported the following information from a random sample of 830 stolen cars: 140 were Nissan, 100 were Kia, 270 were Toyota, 230 were Honda and 90 were other brands. Suppose it is known that 15% of all the cars were Nissan, 15% were Kia, 35% were Toyota, 30% were Honda and 5% others.

**You are required to:**

Use Chi-square goodness of fit test with significance level $\alpha = 0.01$ to test the hypothesis that proportions of stolen cars are identical to population brand proportions.

**(15 Marks)**
**QUESTION 4**

Observation plays vital roles as a data collection method in a research design but not popularly used due to its associated threats.

You are required to:

(a) Explain briefly any **THREE** differences between observation and survey methods of data collection.  
(6 Marks)

(b) Discuss briefly any **THREE** factors that affect the choice of participants in an experimental design.  
(9 Marks)  
(Total 15 Marks)

**QUESTION 5**

Research provides insight into every functional area of business. It can be classified according to the procedure of investigation.

You are required to:

Explain any **FIVE** classifications of research in behavioural sciences by methods. 
(15 Marks)

**QUESTION 6**

(a) i. What is internal validity?  
(2 Marks)  
ii. Describe briefly **THREE** factors that affect internal validity.  
(3 Marks)

(b) i. What is external validity?  
(2 Marks)  
ii. Describe briefly **THREE** factors that affect external validity.  
(3 Marks)

(c) i. Explain what is meant by validity of a measure.  
(2 Marks)  
ii. Explain briefly any **THREE** types of validity of a measure.  
(3 Marks)  
(Total 15 Marks)

EXAMINERS’ REPORT

The questions cover the entire syllabus. About 80% of the candidates scored 50% and above of the allocated mark. The major pitfall of the candidates was their inability to understand the concepts and principles involved in this subject.
Candidates should learn how to recognise the correct option by having the proper and adequate understanding of concepts and principles involved in this subject for better performance in future.

PART II SHORT-ANSWER SOLUTIONS

1. Semantic
2. Persuasion/persuasiveness
3. Correctness/Fidelity/Effectiveness
4. Rumour
5. Language
6. Verbal/Oral
7. Intrapersonal communication/soliloquy
8. Interquartile range
9. Central tendency
10. Weighted average
11. 8960
12. Footnotes and endnotes; numerical numbering/ superscript numbering
13. (Report) format/table of contents
14. Appendices
15. Alphabetically/in alphabetical order
16. Inferential
17. Random/probability (Sampling)
18. Correlation
19. Finding
20. Methodology/Literature review
Tutorials

11. \( \frac{4}{25} \times \frac{56000}{1} \)
   
   = \( 4 \times 2240 \)
   
   = \( 8960 \)

EXAMINERS’ REPORT

The questions cover the entire syllabus. About 30% of the candidates scored 50% and above of the mark allocated. Candidates did not understand most of the concepts and principles tested in this section. They should familiarise themselves with the concepts and principles contained in the syllabus to better their performance in subsequent examinations.

SOLUTIONS TO SECTION B

QUESTION 1

1.0 Heading

Report of the committee on reasons why there is increase in the number of candidates seeking to become professional accountants through Institute of Chartered Accountants of Nigeria (ICAN) submitted on 19th November, 2013.

2.0 Introduction

The President of ICAN set up a committee to investigate reasons for increase in number of candidates wishing to become professional accountants through ICAN, analyse their needs, challenges faced by them and make appropriate recommendations.

3.0 Membership

List of members of the committee.

4.0 Methodology/Methods of Investigation

Method(s) of investigation employed in carrying out the assignment e.g. questionnaire/interview, and the method of administering the instrument e.g. random sampling.
5.0 Findings
List findings during investigation
- Rate of increase in candidates’ number and what has been responsible for this
- Needs of candidates in terms of availability of study materials in different forms
- Challenges faced by candidates with respect to syllabus, access to tutorials and libraries.

6.0 Observations
What was observed during investigation
- ICAN remains a market leader in professional examination administration in the field of accounting in Nigeria;
- ICAN maintains a well organised structure with district level activities;
- ICAN presence and visibility on national stage and active defence of members’ interests make membership of the Institute a worthwhile choice;
- ICAN’s syllabus needs to be broken down into more details in order to make learning and teaching easier.

7.0 Conclusion
Conclusions drawn from findings and observation
- ICAN is a leading professional examination administrator in Nigeria;
- ICAN needs to sustain and strengthen members’ participation and benefits;
- ICAN has a wide range of candidates with specific and special needs;
- ICAN needs to continue to fine-tune her activities.

8.0 Recommendations
List of committee’s recommendations
- ICAN needs to strengthen her membership sustenance services;
- The Institute is to remain visible at the national level
- The Institute is to initiate the process for expanding the syllabus into detailed document;
The Institute needs to conduct needs analysis of her candidates;
- The Institute needs to produce her literature in electronic format and make them available as e-books.

9.0 Appendices

Questionnaire administered

10.0 References

11.0 Circulation/Distribution list

EXAMINERS’ REPORT

The question tests candidates’ ability to write a report outline. About 60% of the candidates attempted the question. The performance of candidates was very poor as only about 2% of them scored 50% and above of the allocated marks. Candidates’ major pitfalls are:

- lack of adequate knowledge of the concept of ‘outline’;
- ignorance of the components of a report;
- lack of and inadequate idea of what to write under the few components identified by candidates.

Candidates should learn the different parts of a report and know the features of the different parts for better performance in future examinations.

SOLUTION 2

The relevant issue in relation to the factors of workers’ attitude, language and timing are

(i) Workers’ attitude

(a) emotion as a basis of attitude
(b) arrogance of authoritarian communication
(ii) Language

(a) Polysemy or diversity of meanings  
(b) Context of use to determine actual meaning  
(c) Use of jargon as a communication barrier

(iii) Timing

(a) Right timing of communication  
(b) Time of convenience

(i) Workers’ attitude

The attitudes of parties in communication in an organisation are among the most important things in achieving effective understanding. No human being is absolutely rational in his/her thinking or actions. Most of the time, people react to situations or communications emotionally. Since emotion is the basis for attitude, the attitude of the communicator can affect the emotion and therefore the attitude of the receiver positively or negatively. Since communication usually originates from the top and vertically flows down to the shop floor workers, the initiator must do everything possible to do away with emotional words and imperative expressions that can trigger emotional reactions from the receivers. A trace of arrogance or authoritarianism in the communication will offend the sensibility of the workforce which may give rise to industrial unrest and consequently a loss of many man-hours and huge profits to the company.

(ii) Language

The language of communication must be understandable. By nature, English words are polysemantic or diverse in meanings. Such words often give rise to ambiguity which the receiver may not be able to resolve. This often leads to reading between the lines. The initiator of communication must use such words in context to disambiguate his message. Where the receiver is not sufficiently skilled or knowledgeable to use the context to determine meaning, poor understanding or outright misunderstanding will occur. The communicator, in order to achieve understanding, must use familiar words.
If a familiar word is used in an unfamiliar manner, the communicator must give the meaning that he intends the receiver to get from the message. The communicator must be ready to explain or avoid every jargon or technical language that may lead to communication breakdown if unexplained. When communication breaks down in an organisation, productivity will be adversely affected and this may lead to the collapse of the organisation.

(iii) Timing

In workplace communication, timing can make or mar the effectiveness of the communication process. An important message delivered too late will become irrelevant and unprofitable. A message delivered at a time the receiver is not receptive is wasted. Good timing is of the essence in communication. Improperly timed communication may lead to reduced effectiveness of the message and interaction. No worker appreciates being given an urgent task that must be finished close to the end of the working hour, particularly on the last working day of the week. Such a task will not be properly executed and may prove costly. Communication received at a time of convenience will receive the attention and cooperation of the receiver. A request should not be placed with someone who is busy with an urgent matter of the moment because that request may generate anger in the intended receiver. This is because the timing is not convenient. He may do a shoddy job which can prove costly to the company. For example, a bid for a contract may be lost if the bid is sloppily handled because such a bid will project an image of inefficiency.

EXAMINERS’ REPORT

The question tests candidates’ ability to identify communication factors militating against productivity in an organisation. About 90% of the candidates attempted the question. Out of this, about 40% scored 50% and above of the allocated marks.

Many candidates did not understand the demand of the question. They were also unable to marshal their points as a result of poor expression.

Candidates should learn how to relate communication concepts to practical life situations. They should also make use of ICAN study pack and past questions for better performance in future.
The expected value is computed thus:

Nissan = $830 \times \frac{15}{100} = 124.5$

Kia = $830 \times \frac{15}{100} = 124.5$

Toyota = $830 \times \frac{35}{100} = 290.5$

Honda = $830 \times \frac{30}{100} = 249.0$

Other = $830 \times \frac{5}{100} = 41.5$

<table>
<thead>
<tr>
<th>Category</th>
<th>Brand</th>
<th>Observed</th>
<th>Expected</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Nissan</td>
<td>140</td>
<td>124.5</td>
</tr>
<tr>
<td>2</td>
<td>Kia</td>
<td>100</td>
<td>124.5</td>
</tr>
<tr>
<td>3</td>
<td>Toyota</td>
<td>270</td>
<td>290.5</td>
</tr>
<tr>
<td>4</td>
<td>Honda</td>
<td>230</td>
<td>249.0</td>
</tr>
<tr>
<td>5</td>
<td>Others</td>
<td>90</td>
<td>41.5</td>
</tr>
</tbody>
</table>

Step 1 $H_0$: The proportion of stolen cars are identical to population brand proportion

$H_1$: The proportion of stolen cars are not identical to population brand proportion

Step 2: Level of significance ($\alpha$) = 0.01

Step 3: $X^2 = \frac{\sum (O - E)^2}{E}$

Where $O$ is observed value

$E$ is expected value

$X^2_{cal} = \frac{(140 - 124.5)^2}{124.5} + \frac{(100 - 124.5)^2}{124.5} + \frac{(270 - 290.5)^2}{290.5} + \frac{(230 - 249)^2}{249} + \frac{(90 - 41.5)^2}{41.5}$

$X^2_{cal} = 1.93 + 4.82 + 1.45 + 1.45 + 56.68$

Step 4: $X^2_{cal} = 66.33$

Step 5 = Degree of freedom (D.f) = 5 - 1 = 4

The table value of $X^2$ with degree of freedom 4 at 0.01 level of significance is 18.46.

(18.46 is obtained from statistical table).
Step 6 = Decision rule. The decision rule states that if the calculated value of $X^2$ test statistic is greater than the table value, reject the null hypothesis ($H_0$); otherwise accept $H_0$.

Step 7 = Since $X^2_{cal}$ value (66.33) is greater than the table value (18.46), the null hypothesis ($H_0$) is rejected.

EXAMINERS’ REPORT

The question tests candidates’ knowledge of hypothesis testing using chi-square test. About 90% of the candidates attempted the question and about 60% of them scored 50% and above the allocated marks.

Many candidates did not know the type of categorical data and goodness of fit using the chi-square. They did not state the hypothesis correctly. Candidates should learn all areas of hypothesis testing by using ICAN study pack and past questions for better performance in future examinations.

SOLUTION 4

(a) The differences between the observation and survey methods of data collection include the following:

(i) Observation method is the act of noting, recognising and watching situations or events of interest for the purpose of data collection, whilst the Survey method could use questionnaire, interview and focus group interview to collect data.

(ii) Observation method may not require active interaction between the respondents and the observer while survey method may require active interaction between the researcher and the respondents.

(iii) Under the observation method, participants may not be required to fill structured questionnaire while the survey method may require the respondent to fill structured and unstructured questionnaire. This makes the respondents to be restricted to certain options or opinions.
(iv) Under the observation method, the observer usually experiences a condition where one’s reasoning is blinded by a preconceived idea while survey method is free from this condition.

(v) Data collected under the observation method are more difficult to score or analyse quantitatively than those collected through survey method.

(vi) Observation methods are more susceptible to bias than the survey methods.

(b) Factors that affect the choice of participants in an experimental design includes

(i) **Objectives of the study:**
The objectives of the study which may include the research questions to answer and the hypothesis to test will determine the types and nature of participants to choose for the experimental design.

(ii) **The study population size:**
The size of the population determines the number of the participants (sample size) of the experiment design. The larger the population size, the larger the sample size, and vice versa.

(i) **The shared characteristics of participants:**
The features or characteristics of individuals’ elements or objects in the population will determine the choice of participants. These characteristics could be homogeneous or heterogeneous. This helps in selecting representative participants.

(ii) **The number of groups involved in the study:**
The more the number of groups and their characteristics either homogenous or heterogeneous could affect the choice of participants.

(v) **The study setting:**
The study setting such as laboratory and field will influence the choice of participants. Some participants may not be suitable for laboratory or field experiment and this can influence the choice of participants.
(vi) The scope of the study:
The scope of the study is the geographical area covered, period and the subject matter. Therefore the scope can influence the choice of participants.

EXAMINERS’ REPORT

The question tests candidates’ understanding of data collection methods particularly the distinction between observation and survey methods of data collection. It also tests their knowledge of the factors affecting the choice of participants in an experimental design.

Above 85% of the candidates attempted the question. The performance was poor as about 30% scored 40% and above of the allocated marks.

Candidates’ major pitfalls include:
- lack of adequate understanding of the question;
- Wrong interpretation of the demand of the (b) part of the question;
- Inability to differentiate between observation and survey methods of data collection;
- Inability to organise their points as a result of poor expression.

Candidates should always endeavour to understand the demand(s) of a question before attempting it.

SOLUTION 5

The classification of research by method in behavioural sciences include:

(i) Descriptive Research:

This research entails the assessment and description of certain events or situations using some attributes, properties or characteristics. Descriptive research helps to explain relationship between variables, testing of hypothesis and development of generalization of principles or theories that have universal validity.
(ii) **Survey Research:**

The survey research method investigates problems which are usually viewed with large population or studying the samples from the population so as to estimate the population parameters. It takes a critical examination of the events with the intent of providing the information about the condition of such situation. Survey research method uses research instruments like questionnaire, interview and observations for data collection. Survey research can be quantitative or qualitative.

(iii) **Historical Research:**

This research method takes a critical and systematic examination of the past events in order to understand the present and predict the future or occurrence of such events. The major feature of historical research is the records of dates of events and their possible influence of certain phenomena. The findings and conclusions could be subject to the researcher’s opinion.

(iv) **Ex-post-facto Research:**

This is also known as causal comparative research which determines the cause and effect of an event. The Ex-post-facto research establishes relationship between cause and effect of an event by examining the conditions that are traceable to the probable causal factor of the event being studied. In ex-post-facto research, the researcher has no control of the variables because they are already in existence. However, the researcher can carry out further investigation into the effect and determine the causes of the events. The major characteristic of this type of research is that it specifies the period as well as the population group to be studied.

(v) **Case-Study Research:**

This research uses a particular event or situation to study the population of interest. In the investigation process, the time frame or period must be clearly defined and the conclusion drawn from the particular event or situation is used to generalise or estimate the behaviour of the population. The major characteristic of case-study research is the specification of the period of study as well as the population group to be studied.
(vi) **Correlational Research:**
This is a research study that seeks to establish relationship between given variables and the type of relationship that exists between them. In the process of carrying out a correlational research, the researcher could specify a model relating the given variables. The relationship established can be used for prediction of future values of a given variable. Correlational research could be quantitative or qualitative.

(vii) **Experimental Research:**
This type of research investigates the possible cause-and-effect relationship between two or more groups. The major feature of this research is that it has a control or manipulating group. The effect of manipulation is achieved by using one or more descriptive methods. This is further achieved by exposing the experimental group (the group to be studied) to one or more treatments and comparing the result with the control group (the group that does not receive any treatment).

**EXAMINERS’ REPORT**

The question tests candidates’ understanding of the basic classification of research methodology. About 80% of the candidates attempted the question. About 52% of this number of candidates who attempted the question scored 50% and above of the allocated marks.

The major pitfall of the candidates was their inability to explain clearly the different types of research methods.

Candidates should learn more about the classification of research methods in order to be able to differentiate between the different types, their uses and applications.

**SOLUTION 6**

(a) (i) Internal validity is the ability of a research design to adequately test the given hypothesis. Essentially, internal validity is the ability of a design to test the hypothesis that it was designed to test.
(iii) Factors affecting internal validity are tabulated below

<table>
<thead>
<tr>
<th>Factors</th>
<th>Descriptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>History</td>
<td>Specific events other than the treatment that occur between observations.</td>
</tr>
<tr>
<td>Maturation</td>
<td>Performance changes due to age or fatigue confound the effect of the treatment.</td>
</tr>
<tr>
<td>Testing</td>
<td>Testing prior to the treatment changes how subjects respond in post-treatment testing.</td>
</tr>
<tr>
<td>Instrumentation</td>
<td>Unobserved changes in observer criteria or instrument calibration confound the effect of the treatment.</td>
</tr>
<tr>
<td>Experimental mortality</td>
<td>Differential loss of subjects from the groups of a study results in non-equivalent groups.</td>
</tr>
<tr>
<td>Biased selection of subjects</td>
<td>Group of subjects exposed to different treatments are not equivalent prior to treatment.</td>
</tr>
</tbody>
</table>

(b) (i) A study has external validity to the degree that its result can be extended beyond the limited research setting and sample in which they were obtained. The idea seems to be that all studies should be conducted in such a way that the findings can be generalised immediately to real-world situations and to larger populations.

b(ii) Factors affecting external validity are tabulated below

<table>
<thead>
<tr>
<th>Factors</th>
<th>Descriptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reactive testing</td>
<td>Occurs when a pretest affects participants’ reaction to an experimental variable, making those participants’ responses unrepresentative of the general population.</td>
</tr>
<tr>
<td><strong>Multiple treatment interference</strong></td>
<td>Occurs when participants are exposed to multiple experimental treatments in which exposure to early treatments affects responses to later treatments.</td>
</tr>
<tr>
<td><strong>Reactive effects of experimental arrangements</strong></td>
<td>Refers to the effects to highly artificial experimental situations used in some researches and the participants' knowledge that he or she is a research subject.</td>
</tr>
<tr>
<td><strong>Interactions between participant selection biases and independent variable</strong></td>
<td>Effects observed may apply only to the participants included in the study, especially if they are a unique group.</td>
</tr>
</tbody>
</table>

(c) (i) The validity of a measure is the extent to which it measures what the researcher intends it to measure.

(ii) Types of validity of a measure

- **Face validity:**
  This describes how well a measurement instrument appears to measure what it was designed to measure. Face validity is a weak form of validity in that an instrument may lack face validity and yet, by other criteria, measures what it is intended to measure.

- **Content validity:**
  This has to do with how adequately the content of a test, samples the knowledge, skills, or behaviours that the test is intended to measure. A test designed to measure “assertiveness” would have content validity to the extent that it is adequately sampled from the population of all behaviours that would be judged as “assertive”.

- **Criterion-related validity:**
  This reflects how adequately a test score can be used to infer an individual value of “criterion” measure. To determine the test’s criterion-related validity, you compare the value inferred from the test to the criterion values actually observed.

- **Construct validity:**
  This applies when a test is designed to measure a “construct”, which is a variable not directly observable, that has been developed to explain behaviour on the basis of some theory.

**EXAMINERS’ REPORT**

The question tests candidates’ understanding of the concept of validity of measurement instrument in research.

About 75% of the candidates attempted the question. Out of this number, about 45% scored 50% and above of the allocated marks.

Candidates’ major pitfall was their inadequate knowledge of the concept of validity. For candidates to perform better in subsequent examinations, they should

- Learn the concept of validity
- Make use of ICAN study pack and Pathfinders.
